

LOCAL NEWS

Dr. and Mrs. C. H. Conover entertained Mr. and Mrs. William Parsells and son Milton also Mr. and Mrs. Adams of Pleasantville over Sunday.

Capt. Thomas A. Mathis and Maja Leon Berry of Toms River were in town on Monday night in a fine new Marmon car. They have just returned from a 15 days tour in the South visiting the former's son Steelman who is in a training camp near Asheville Georgia.

William Kelley, of Camden spent Sunday with his parents Mr. and Mrs. and Mrs. Jas. W. Kelly.

Mr. and Mrs. Barton Seaman and daughters Eleanor and Gladys, of Philadelphia are visiting Mrs. R. L. Bragg.

Mrs. George Bishop and Mrs. Charles Parker have returned from an extended visit to Bristol Pa.

Mrs. Elizabeth McClure and Miss Ella M. McClure are visiting Mr. and Mrs. Albert Pharo.

Mrs. Ida A. Stiles returned last week from a three weeks visit in Bridgeville with Mr. and Mrs. Benj. H. Crosby.

Frank E. White, of Mt. Holly visited his parents Mr. and Mrs. Frank White over Sunday.

Mr. and Mrs. Roy Marshall of Philadelphia are visiting at the home of Mr. and Mrs. Harvey Stiles.

Mrs. Adelbert Marshall and daughter Mildred have returned from a visit to Merchantville.

Mr. and Mrs. Calvin E. Parker and son Francis are visiting in New York.

Fred Brown, of Camden was home over Sunday.

Mr. and Mrs. Isaac Stiles and son have returned to their home in Trenton after an extended visit with relatives here.

Myer Love, of Vineland, spent two of this week here.

Arthur Allen, of Pennsgrove, is in town.

Archie Pharo, of Pennsgrove spent two days at his home last week.

Ralston Pharo's family have moved here from Pennsgrove.

Miss Dora Lazoroff spent Sunday in Beach Haven.

Mrs. Florence Kayser and daughter Miss Ethel are visiting Mrs. Annie Nichols in Franklinville.

Edward Jacobson, of Philadelphia, visited his home here over Sunday.

Mrs. Chazen of Philadelphia visited Mr. and Mrs. Reuben Gerber for the week end.

Mr. and Mrs. George F. Randolph and Mrs. E. O. Horner and son Errol Jr. have been visiting in Beach Haven.

Miss Ada Brysons of Beach Haven, spent several days here with relatives recently.

Mrs. Howard Bird and daughter Angie and Mrs. Joseph M. Bird son Frank and daughter Mimie and Mrs. Samuel Jones and son Demott all motored to Atlantic City Monday afternoon and attended the circus and visited Mr. and Mrs. Ruloff Morey and returned home Tuesday evening.

Mrs. Amanda Seaman, 69 years of age, was found dead Tuesday morning at the home of Joel J. Salmons where she has made her home for the past two years. Mrs. Seaman was the widow of the late Clayton Seaman.

Mr. and Mrs. Howard Charlie, of Camden, were recent guests of Mr. and Mrs. LeRoy Marshall. Mr. Charlie is manager of the credit department of the Victor Talking Machine Company and Mr. Marshall, a former Tuckerton boy is in the advertising department of the same company.

T. J. Mertha, assistant cashier at the Philadelphia post office was a guest of W. I. Smith last Saturday. They caught 50 nice fish on a trip on Tuckerton Bay.

Mr. and Mrs. Thomas R. Fort, of Ocean City, were guests of Mr. and Mrs. John H. Webb on Monday. Mr. Fort is the president of the Thomas W. Price Company of Philadelphia, one of the largest dealers in paper in the United States.

Don't fail to hear Mr. R. F. Engle, president of the Ocean County Mosquito Extermination Commission at the Palace Theatre tonight. Mr. Engle will give an address on the control of this pest and his talk will be illustrated with motion pictures. This will be in addition to the regular movie show. Mr. Engle's talk will be exceedingly interesting and instructive to shore folks, as he is an authority on mosquito control work.

Mr. Engle will explain and illustrate where mosquitoes are bred, and the different stages from the egg to the time it is on the wing and the work being done to eliminate the pest.

Mr. and Mrs. Thomas Rider entertained the latter's mother and sister, Mrs. Charles Klinger and Mrs. Philip of Mt. Carmel also Mrs. Fry, of the Central Hospital, Philadelphia.

Mr. and Mrs. Edward Fuher and son Albert of Essington were recent guests of Mr. and Mrs. Anson Rider.

Miss Agnes Regal, of Camden, is visiting Miss Elsie and Lena Morey.

The Misses Elsie and Lena Morey spent Sunday in Cape May. Mrs. Herman Morey accompanied them on their return.

Mrs. George Roth, of Philadelphia spent the week with her daughter, Mrs. Samuel Carhart.

Mr. and Mrs. Samuel Carhart entertained Mrs. Henry Remely of Mickleys Pa., during the week.

Miss Christine Roth, of Philadelphia again visited Tuckerton, spending a few days with her sister, Mrs. Samuel Carhart.

Halsted S. Horner, Chief Yeoman on the battleship Massachusetts, accompanied by his friend Ralph H. Blanchard varsity debate leader, of Cornell University, spent the week end with Capt. and Mrs. E. A. Horner.

Mr. and Mrs. O. Atkinson entertained company from New York over the week end.

Irving Penn and family, of Philadelphia, are spending some time with Mr. and Mrs. E. A. Shinn.

Nathan Letts spent Saturday in Red Bank.

Mr. and Mrs. William Jones of Riverton spent Sunday with Mrs. Salmons.

Mrs. Clarence Ireland, of Trenton, spent a day this week with Mr. and Mrs. Joseph Bihop.

Thomas Cranmer is building a bungalow at Pleasant View.

Roy Jackaway is employed by the Standard Oil Co.

Reuben Corlis entertained company from Burlington over Sunday.

Selection of Drafted Men From Ocean County Will Begin at Toms River Next Week.

A list of names of persons in the order of their liability, for military service in the selective draft is given below.

The quota that Ocean County must furnish is 169, and the understanding is that the first call will be double that number, in order that there may be enough after exemptions are made, it being figured by the department that one man of each two will be exempted. It is the opinion of those who have gone over the list that if married men are exempted, it will take a much larger number than 338 to produce the quota of 169 in this county, as the chance of the draft seems to have been partial to married men.

The local exemption board at Toms River has announced that examination will be given at Toms River next Monday and they hope to complete the work in three days—examining 112 Monday, 112 Tuesday and 113 Wednesday of next week. The list follows:

- 298 Oliver E. Havens, Herbertsville 1
- 299 John Garretson, Toms River 2
- 300 Walter B. Swain, New Egypt 1
- 301 George R. Fries, Lakewood 4
- 302 Ross Earl Miller, Lakewood 1
- 303 Frank Miller, Pt. Pleasant 6
- 304 Harry G. Hecht, Lakewood 7
- 305 John Jos. Tompkins, Lakewood 10
- 306 Louis E. Salmons, Manahawkin 9
- 307 Max Broschiet, Lakewood 10
- 308 Percy Applegate, Toms River 1
- 309 George Ross, Jacksons Mills 1
- 310 Floyd A. Osborn, Herbertsville 1
- 311 Harry J. Staples, Toms River 1
- 312 Theodorius L. Bell, Whittings 15
- 313 Henry B. Bennett, Lakewood 18
- 314 Philip Applegate, Toms River 25
- 315 William Lord, Manahawkin 19
- 316 Philip Applegate, Toms River 16
- 317 Howard M. Cornell, Cassville 1
- 318 LeRoy Grant, Toms River 31
- 319 Lee Grove, Lakewood 35
- 320 Hugh Thompson, Jr., Manchester 35
- 321 Raymond C. Dickens, Mayetta 29
- 322 William Lord, Manahawkin 19
- 323 Frank D. Swain, New Egypt 1
- 324 Howard M. Cornell, Cassville 1
- 325 LeRoy Grant, Toms River 31
- 326 Lee Grove, Lakewood 35
- 327 Hugh Thompson, Jr., Manchester 35
- 328 Raymond C. Dickens, Mayetta 29
- 329 James C. Brown, Lakewood 1
- 330 Eugene P. Uecker, Lakewood 41
- 331 Wilbur Conklin, Cedar Run 41
- 332 Frank D. Swain, New Egypt 1
- 333 Herschel E. Stout, Toms River 50
- 334 Arthur C. Brown, Lakewood 41
- 335 George H. Bogert, Toms River 45
- 336 Paul S. Goble, New Egypt 45
- 337 John A. Cramer, Beach Haven 48
- 338 John A. Cramer, Beach Haven 48

Manahawkin

Mr. and Mrs. Harry Crane are rejoicing over the birth of a son.

Mr. and Mrs. George Bowen and son spent Sunday at Arlington Beach with Mrs. Samuel Johnson.

Mrs. Angie Wildmger of Collingswood, is spending some time with her parents Mr. and Mrs. Charles Crane.

Mr. and Mrs. George Cranmer, of Cedar Run, were Sunday callers in town.

Mr. and Mrs. Lewis Rushton, of Haddon Heights, spent Sunday at their houseboat on the bay.

Mrs. Anna Paul has been ill for the past week.

Mr. and Mrs. O. Atkinson entertained company from New York over the week end.

Irving Penn and family, of Philadelphia, are spending some time with Mr. and Mrs. E. A. Shinn.

Nathan Letts spent Saturday in Red Bank.

Mr. and Mrs. William Jones of Riverton spent Sunday with Mrs. Salmons.

Mrs. Clarence Ireland, of Trenton, spent a day this week with Mr. and Mrs. Joseph Bihop.

Thomas Cranmer is building a bungalow at Pleasant View.

Roy Jackaway is employed by the Standard Oil Co.

Reuben Corlis entertained company from Burlington over Sunday.

Stephen Palmer, of Jersey City, was a week end visitor with his uncle Alexander Inman.

Harry Adams and family of Philadelphia, are spending their vacation with Mr. and Mrs. Wm. Adams.

Mrs. Harry Willits and children, of Beach Haven, spent a few days recently with Mrs. Sherwood Corlis.

Mrs. Maggie Parker and children, of Parkertown were over Sunday visitors with her father John Corlis.

Miss Agnes Paul is spending a few days with relatives in Atlantic City.

Wm. Lowery of Philadelphia spent the past week at home with his mother.

C. H. Cranmer and family spent the past week in their cottage at Surf City.

Rev. and Mrs. Bilderback are entertaining their granddaughter.

George Inman and Harry Adams motored to Wrightstown on Monday last.

Benjamin Paul, Reuben Corlis and Harvey Cranmer left on Monday for Wrightstown where they are employed.

Mr. and Mrs. George F. Randolph, Mrs. E. O. Horner and son, Errol, Jr. of Tuckerton, were in town one day this week.

Mrs. John Bennett of Tuckerton, was a Monday caller in town.

LITTLE OR NO CATCH ON BARNEGAT BAY OYSTER SHELL BEDS

Commissioners Say We Have Biggest Opportunity in State

The following is taken from the New Jersey Courier of last week:

The Board of Shellfish Commissioners of New Jersey, on their annual tour of inspection of the shellfish bearing waters of the state, spent Tuesday looking over the new oyster planting development in Barnegat Bay on the Pennsylvania Railroad bridge south to the mouth of Forked River and beyond.

The Commissioners, several of whom are from Cumberland, Cape May and Atlantic counties, were unanimous in the statement that they thought the opportunities for developing the oyster industry in this part of Barnegat Bay surpassed any other opportunity in New Jersey. They said there was not such another landlocked and almost tideless bay, of such area, and such uniform depth of water, to be found anywhere on the Atlantic coast.

They found there had been a big change in this part of the bay in the present year. Planting in this section was begun last summer when the West Creek Oyster Co., composed of Joseph B. Cox and Theodore Kelley of West Creek, Frank R. Austin, Ezra Stiles and Arnold Cranmer of Tuckerton, staked up 64 acres south of Cedar Creek point and planted it with 5000 bushels of shells. This year, under the new law which threw open the ground north of the middle point of Cedar Creek to leasing, the Commission found there had been from 1200 to 1500 acres of ground staked off and leased, and some 70,000 to 75,000 bushels of shells planted. These lots are to be surveyed and mapped inside of the next week or two. There has been reserved as natural oyster beds, the Sloop Creek beds, a larger space, also on the west side of the bay, at the mouth of Cedar Creek. These grounds are closed except in May and June of each year, and anyone taking seed oysters from them at that time will need a license. The beds in the mouths of the creeks emptying in the bay are open for oystering by the public.

The large leaseholds are practically all on the flats east of the bay channel. The west side of the bay, divided into smaller lots of five and ten acres, has been saved for the oystermen of the neighborhood, as they can work under the lee of the shore with a west wind in winter, when it would be too rough to go out farther in the bay.

The Commissioners were disappointed in finding little spat had

caught on the large amount of hells thrown overboard this May and June, or on the old shells and reefs. It was figured that the heavy rains since July 1 were responsible for that condition. Two weeks ago the bay water was full of embryo oysters, swimming about. Either too salt water or too fresh water seems to interfere with the setting of spat. Some of the Commissioners were of the opinion that when the water is too salt, the spat float at the surface and have no chance to get on the bottom, owing to the greater specific gravity of the very salt water; also that when the water is too fresh, either the oyster embryo sinks to the bottom before it is ready to attach itself to the cultch, because of the lessened density of the water, or else the fresh water weakens the vitality of the embryo.

At any rate very few shells tonged up on Tuesday showed a set of spat. There is however still considerable oyster embryo swimming in the bay water, and the spawning oysters are not yet emptied of spawn, so there is some chance of a late set. Ordinarily however if a catch is not made by this time, a big catch is not looked for. Having spent thousands of dollars in shelling the grounds this spring, the planters had hoped for a catch this year, but that is one of the chances they take.

Next year the planters are arranging to have spawning oysters brought to the bay and planted from New England and Virginia both. They think this cross-fertilization of the native Jersey oyster with the eastern and Virginia oysters, will add greatly to the vitality of the train produced. One female oyster is said to lay from a million to sixty million eggs; but the egg and the oyster that hatches from it, while still in size so small that it requires a microscope to see it, have many enemies that feed upon them. If one in a million is fertilized, sets and grows to be an adult oyster the planter is in luck.

Next year too there will be many more shells planted. This year the shells cost on an average some twelve cents a bushel, when on the ground. This is considered too high. A siding has been laid along side of "the ditch" at the railroad bridge, and shells will be bought this winter in Philadelphia, when it can be done at advantageous prices, run down to the bridge and stored there till wanted next May or June. This year the shells were brought from the Ellsworth shucking plant at Keyport. It is believed that in this way several cents can be cut from the cost of a bushel of shells.

The commissioners say that there is a good chance for the baymen of Bayville, Cedar Creek, Forked River, and other shore villages, to make a good living, by taking a lot and planting it. When they oyster in the fall they could sell the marketable oysters and plant the smaller ones on their lots; next April and May, in the open season on Sloop Creek and Cedar Creek beds, what seed oysters they catch they could plant on their own lots. In this way by their own work, and at little outlay of cash they could build up an oyster lot that would support a family.

The Commission is hoping to extend the Sloop Creek and Cedar Creek beds. As the revenue increases some of the money thus derived will be used to put watchmen on the beds, and stop the oyster thievery that has heretofore made oyster planting in Barnegat Bay impossible; and whatever can be obtained for that purpose, will be used to shell the natural bed. It is hoped to build up these beds to cover the entire area now staked out for them, which is several times their present size, though perhaps not so large as they were when the white man first reached Barnegat Bay.

Showing the possibilities of growth with a protective law, Peter Cozier, the head of the commission, told of what had been done in Maurice River Cove. He said in the past ten years the number of acres planted had increased from 1200 to 2400 acres, doubling the leased grounds. Thirty two years ago, he said one car attached to a passenger train took out the oyster shipments each afternoon. This winter the shipments were fifty to sixty cars daily, with a highwater shipment of 8 cars. He believed that all

BEACH HAVEN

Maurice Getz and family of Riverside also Benjamin and Charles Lazoroff of Philadelphia were visitors with Mr. and Mrs. Harris Lazoroff.

Arthur Zumeta, of the U. S. N. was a visitor at William Cooks on Sunday.

Miss Dora Lazoroff of Tuckerton spent Sunday in Beach Haven.

Mrs. Harry Willits and children were recent visitors in Manahawkin with Mrs. Sherwood Corlis.

THE COUNTY DEMONSTRATOR

The County Demonstrator has moved into his permanent headquarters on the second floor of the Court House at Toms River.

Farmers in all parts of Ocean County should know that the office of Farm Demonstration has on hand for free distribution all the available literature published by the experiment station at New Brunswick.

Care of Farm Manure

A loss of 2-3 or more of the fertilizing value of farm manure may easily occur through waste of the liquid which contains over half nitrogen and 4-5 of the potash, and thru exposure of the solid manure to leaching. With fertilizers at war prices this loss has added importance. At least 3-4 of it is preventable.

To prevent waste of the liquid use plenty of absorbent bedding beneath the cows, for this nothing is better than cut or shredded corn stalks, dry peat or muck will absorb several times their own weight of liquid, and their nitrogen content will be made more available by the rotting tarter thru contact with manure.

The straw manure from the horse stable can often be used to advantage behind the cows where litter is scarce.

On fairly level land there is practically no loss from manure spread at any season. Fresh manure has returned in crops \$3.50 per ton while old manure returned \$2.00 per ton, and at the same time the number of tons left at the end of several months was much smaller. If immediate carting and spreading is not possible, keep manure under heater. With plenty of litter there is little loss from manure kept in a covered yard. Where horse and cow manure is mixed and kept tramped down by the stock the ferment which burn up the dry matter and drive off the ammonia are held in check. For holding manure over periods when it is undesirable to cart, a covered shed or pit with a tight bottom will pay for itself in a few years by the fertility saved, and will add greatly to the appearance and neatness of the barnyard. Carting out and spreading as fast as made is the least wasteful.

JOSEPH L. HOLMAN

OF LAKEWOOD, N. J.

CANDIDATE FOR SHERIFF

In the Republican Primaries Next September

I am offering myself as a candidate for this important position. I do it with a full realization of its exacting requirements. I court an investigation of my republicanism and my loyalty to the party from which I seek honors. The September primary will decide between me and if not crowned with success I will be found working in the ranks for the man who was nominated on primary day.

PLAYTIME WITH MEN OF THE NAVY

What Happens When Several Hundred Jackies Are Turned Loose for Shore Liberty.

MAKES FOR THE 'HAPPY SHIP'

Liberality of Private Citizens Has Given Men of the Fleet a Big Athletic Field for Their Recreation.

With the United States Atlantic Fleet—it is two bells in the afternoon watch when the shrill toll of the bos'n's whistles are heard piping the crews of the mighty dreadnaughts to the rails and the sing-song cries of the bos'n's mates carry out over the water, "Liberty party to muster."

This is the summons given three times each week to the men of the Atlantic fleet to take their hours of recreation on the immense athletic field provided for them by the Navy League. By the hundreds, on every battleship and cruiser, the youthful, white-uniformed Jackies come rushing on deck to form into line for the liberty inspection.

Two long white lines form on deck and every man stands rigidly at attention while officers pass along marking the appearance of each one. Their uniforms are spotlessly white. Their shoes freshly blackened. Off come their little round white caps to show that their hair is closely cropped. No visitor to the fleet fails to be struck when he views the line at inspection, with the extreme youth of the men, their intelligent faces and happy, smart appearance. The average age appears to be less than twenty years and many of them seem barely to have passed their eighteenth birthday on the date of their enlistment. From every state in the Union they hail and thousands of them from the farms of the middle West. A collection certainly of America's finest gathered on the deck of a floating fortress to form the first line of the nation's defense.

Off for Day of Sport.
On every sun-tanned face is worn a broad smile in expectation of the sport that the afternoon will bring. Over the rail, the visitor sees the ship's launches bobbing in the seaway with the boys holding fast to the ship's side with their bootheeks. Then the sharp word of command rings out on deck and the white line of sailors begins to move forward toward the gangway and the men go over the side to the waiting launches.

Discipline begins to give way a little at this point, although the coxswain of the boat is all business as he calls to the boysmen to shove off. The afternoon's recreation has begun. Thousands of superfluously healthy, absolutely carefree and very young men are turned loose. To be sure there is the posted guard with their policemen's sticks, but that is only to guard against the chance of ugly blood developing from the fun, which does not break at the athletic field.

FRENCH WAR MINISTER

This is the latest picture of M. Painleve, the new French minister of war taken at the British headquarters on the French front.

YOUR PRINTING
Is a Valuable Asset of Your Business
We Help Our Customers to Succeed With Presentable, Profitable PUBLICITY

On the field to hire them out for "gentlemen's mounts" to the sailors. Obviously the horses are about as used to their saddles as a hog is to work. But they are bred by the sailors at any price the farmer asks. A lad hailing from Maine takes his first chance on horseback and slides down the horse's neck. His shipmate yells at him, "Go aft, you fool, go aft."

The thousands of Jackies swarm over the field. Hundreds of them break and run for the beach for a swim. A crowd of them gather at target practice with small rifles. Six of the ten baseball diamonds are promptly put into use by scrub teams.

And then more launches from the battleships come in bringing the star baseball teams from four of the battleships. A double-header is to be played between four of the best teams of the fleet in a series to determine the fleet championship. The grand stands fill rapidly and soon there are a swelling sea of white suits and red and brown faces as the sailors cheer their ship's teams to victory. Battling good ball is played by these navy teams. The nine men on the diamond represent the pick of a thousand from a battleship and they play with the interest and a good bit of the money of the whole crew backing them. They train and work for months for a championship series like this.

Provides the "Happy Ships."
It is the liberality of private American citizens that has given these men of the fleet their big athletic field. When the war came on the fleet lost the income it usually had for its athletic fund from the Guantanamo cantonment and the Navy League of the United States offered to lay out a field for the men of the fleet. In all about 115 acres have been obtained. The ground has been leveled, plowed and prepared. Ten baseball diamonds have been laid out. Docks were built at the water's edge. A bathing beach was cleared. The officers of the fleet also were provided with tennis courts and a golf course. Every sort of sport is found there. The result is that every man on the fleet has plenty of healthy outdoor sport and the officers of the fleet say that this provision or their recreation has done much to provide "happy ships" in the fleet as it waits for the opportunity to strike a blow at the Hun in defense of civilization and freedom.

NEW MONSTER U-BOATS NOISELESS, SAYS SWISS
A Swiss newspaper correspondent who recently visited Kiel says the German submarines of the latest type are cruisers of 2,000 or more tons, with a radius of action of thousands of miles. At least four of these new U-cruisers have already been built, and several others will be completed this summer.

The submersible cruisers have several batteries of six-inch guns and three torpedo tubes. Their speed is said to be over 20 knots per hour on the surface and 12 knots submerged. Each one of the vessels has a crew of more than 100 men.

POOH-BAH JOINS THE ARMY
Sandberg Held Nearly Every Office in His Town, But War Wooded Him.
Bangor, Me.—When Carl J. Sandberg of The Folks enlisted the other day with Company E of Skowhegan, which is now doing guard duty, he upset the entire officialdom of the town. He was principal of the high school, assistant postmaster, chairman of the board of selectmen, superintendent of schools, notary public, tax collector and game warden.

STONE AGE WEAPON FOUND
Flint Dug Up in Trench Found to Be Club Head Used in Prehistoric Days.
London.—An Australian soldier digging a trench in France found a strangely chipped knob of flint and fastened to it a strong handle, thus converting it into a knobkerrie, which he always carried in his belt. He used it to crack German heads in trench raids.

When he brought it to England the interest of antiquarians was attracted by the flint. Investigations and comparisons resulted in authorities agreeing that it was a war weapon of the Stone Age, used then in exactly the same manner as the Australian was using it in 1917 and showing that in the Stone Age men fought over the same battlefields.

JOT IT DOWN
That we do the very best line of Commercial Printing and at reasonable prices. Give us your next order and let us prove our assertion.
Bear in mind, we want your business, and we propose making ourselves deserving. Are you with us?
THANK YOU

PERTINENT AND IMPERTINENT

Once more has nature asserted her right to repeal her own laws. A small boy has just died from eating green apples.

A worthy cause has nothing to fear from its active foes. It is the slacker who blocks the wheels of progress. If you have borrowed this paper from your neighbor, be sure to return it when you have finished reading it. He subscribed because he wanted it.

When the government finishes with its other investigations it should look into the conspiracy between the weather man and the coal baron.

Perhaps, however, John Barleycorn is wondering what part of the German army walked over him.

Caranza, poor devil, is a back number. Even the joke departments are dropping him.

We might, with excellent results, include congress in the draft. Then they would have to obey orders and do something.

And never before has a list of names been scanned with such keen and overpowering interest. Was it there?

We are in favor of a press censorship if the censor will forbid any newspaper making any reference to the "White House pickets."

Since the draft, those cities that returned padded census reports have been busy explaining what has become of their population.

Speaking of the Chinese puzzle—well, it's still in China.

Let us hope that while Russia is in the reform business she will take a shot at her language.

The embargo properly enforced, will convince some so-called neutral countries that there is a limit to Uncle Sam's "open door" policy—as it should.

Did they call your number, young man. Congratulations!

So the People May Know

that you are in business, come in and let us show what we can do for you in the way of attractive cards and letter heads. Good printing of all kinds is our specialty and if we cannot satisfy you we don't want your business.

That's Fair, Isn't It?

HORNER'S

Make your money go as far as possible and you can do it by trading at Horner's. We carry the largest variety of groceries along the shore, our prices are rock bottom. "Quick Sales and Small Profits" our motto. We guarantee our goods, our weights and our measures. If at any time you detect any of these features we want to hear from you.

We want to make this our banner week and month, and by having your assistance we will accomplish our aim.

We're Opposed to Mail Order Concessions Because—

They have never contributed a cent to furthering the interests of our town—

Every cent received by them from this community is a direct loss to our merchants—

In almost every case the price is met right by the door without delay in receiving goods, and the possibility of mail orders in filing orders—

But—The natural human trait is to buy where goods are cheap. Local pride is usually a thing of the past.

Therefore—Mr. Merchant and Business Man, meet your competition on their own terms. Advise us.

Advertise! The local field is your own. You need to do it to sell yourself the opportunity of a lifetime. An advertisement in this paper will carry your message to hundreds of homes in your community. It is the surest way of killing your greatest competitor. A space of \$741,500; won't cost much. Advise us about it.

RULES TO GOVERN ANSWERING OF EXEMPTION QUESTIONS

The Provost Marshal General's office has made public the following: Thousands of letters reach the Provost Marshal General's office every day concerning the application of the selective service law to individual cases. Some of these letters come from local boards. A vast number of them come from individuals, and the question in the latter case is usually "My circumstances are so and so; am I exempt?"

There are very good reasons why neither of these classes of questions can be answered directly from the Provost Marshal General's office, and some other provision must be made to furnish the information.

The selective service law places the determination of exemptions within the exclusive jurisdiction of exemption boards. Individual cases may not, therefore, be decided by this office. Opinions given on the merits of such cases and without any opportunity to investigate the true facts would not be justified and might be used to influence the action of local boards. Furthermore, an attempt to decide individual cases in this office would be

AN INVASION OF THE EXCLUSIVE FUNCTION OF THE BOARDS.

Rulings Should Go to All Boards. Somewhat the same considerations govern the questions that come direct to the Provost Marshal General's office from local boards. The same sort of questions arise in each board. There are 4,567 boards. There is only one way to answer such questions in a way that will convey the answer to the largest number of boards, and that is by rulings on cases as they arise, but these rulings ought to be communicated to all boards. An answer to boards singly and directly would save it being repeated thousands of times and would leave the center of the system in each State ununiformed. Partly to avoid this multiplication of correspondence the whole system was devised on the present plan.

The whole Nation is organized under what might be termed a system of supervised decentralization. The local boards in each State comprise a separate unit, responsive to the control of the governor. Local boards should address their questions to the governor, who will daily summarize questions that he can not answer and present them to the Provost Marshal General's office, for his whole State. Bulletins will issue from the

PROVOST MARSHAL GENERAL'S OFFICE GIVING THE RULINGS ON THESE QUESTIONS, AND THESE BULLETINS WILL BE SENT TO EVERY BOARD IN THE NATION.

In this way the operation of the law will be systematized and made uniform. Distribution of Information For these reasons the following is announced to the public and the local boards as the rules that will govern the dissemination of information from the Provost Marshal General's office. 1. Questions by individuals should be asked of the local board nearest them. If the board is unable, after consideration of the regulations and rulings, to answer the question to the governor for decision.

2. Questions from local boards should never be addressed to the Provost Marshal General's office but in all cases should be forwarded to the governor of the State. 3. In no case will opinions or rulings be given on individual cases that have not yet been presented to the proper local board.

Answering of Questions In order to enforce these rules the Provost Marshal General's office announces that it will answer no questions from local boards which are addressed direct to this office, but will in each case return the questioner's letter or telegram with a request that it be forwarded to the governor of the State. Questions from individuals will not be answered direct from the Provost Marshal General's office but the letter will be returned to the writer with the request that he ask his question of the local board nearest him.

It is not desired to inject formality into the correspondence of local boards but the requirements of uniformity, consistency, and convenience make it necessary to insist on these rules. The large number of persons affected requires that there should be an information office in each locality. These rules are designed to make the office and the local board answer this purpose, and every effort will be made to make prompt rulings and disseminate rulings of a general character to every local board in the United States.

It is requested that the press give this information the widest practicable publicity.

Most Deadly of Diseases. The fact that the germ of the pneumonic plague is a relative to the bubonic germ and that no one knows how it becomes pneumonic, as a specialist has declared, make very little difference to the sufferer from the disease, for it is said to be about 100 per cent fatal. It is the plague which killed off 25,000,000 Europeans in the fourteenth century.

Mean Man's Tankard. One of the quaintest drinking vessels in existence may be seen at Nuremberg in the old fifteenth-century inn where Albrecht Durer took his ease. It is a double vessel, one tankard fitting closely into the other, and is said to have been the artist's own design and reserved for himself and his wife. When he was in good humor, says tradition, Durer had the inner tankard taken out and given for his wife, who displeased he kept both together for his own use and let his companion go dry.

INDIVIDUALISM vs COOPERATION

Tuckerton, July 23, 1917 To the Beacon: Perhaps it might be said that we take our tasks too easily. There is a general process of awakening going on around us; if the war should accomplish nothing more, it will arouse us to a sense of valuation of the relationship of Man. In this country we have been living in an age of the utmost freedom to the Individual. It has been the Individualist period, with every fellow for himself and the Devil take the hindmost. This has been practiced to a point where in many phases of our life it has amounted to license to do almost anything that we pleased or that brought profit or fancied renown regardless of its effect on our fellowmen. About the only goal we have had has been the mighty dollar. But I think—our only decoration—the mighty dollar is receding into the background, and the men of exceptional ability, more than ordinary talent, will look for honor instead of reward, in other words not in direction of one, but of two results: first and foremost to some good public work accomplished, and secondly to wealth acquired. Let us take heart and ponder. Have we not emphasized our individualism? Have we not been careless of its effect on our fellow man? We have not cultivated the team work that we hold, the subordination of the Individual to the scheme in general, of co-operation for the accomplishment of better and bigger things than mere money making. If I could only teach the people of this shore front to standardize the economic phases of their occupations! It would secure abetter opportunity to prosper, but then we must give up that personality which has taken on the character of license, which interferes with the first aim—the excellency of general conditions as neighbors. We need more of the studious gatherings; less of the Individualist, of the Empiric and more of the comradeship of Orthodoxy. If we do this and strive sincerely in act in spirit vocational improvements we will have less of the politician and more of the blessing of knowing one another, of annealing our necessities, our desires and securing our relief. Take the drom fish which destroys so much of our infant oyster plants, as well as the expected profit from the grown oyster. With all our powers more helpful to one another we would come out to the meetings of our pretty boroughs. We would anticipate the Life Guards' warning that the "school was in sight" and our dynamite would be ready to frighten them out of the bay. Do you need greater evidence of far sightedness than this? \$50 for prevention to save, probably \$15,000. This is only one illustration. The pity of it is that ten men will influence a law maker to give them what twenty don't want. Everything that you possess is furnished from the atoms of nature, made consequent to your happiness by the work and art of your fellow men. Why don't we join hands? We can have argument. If it weren't for such there would not be any horse racing. It's the arguments that get us together. Make the race. Then we all respect the winner. Why not get together and make a winner of our mutual desires. Your desires will not "get by" with the Senate or Congress unless you come together and all want the same thing.

The prospects of winter improvements are of great importance, and I hope to describe living benefits all along our shore front in the near future.

Thomas I. Wilson Chairman Hunters' and Fishers' Protective Ass'n. HOW TO SAVE THE BABIES Whenever an epidemic, like that of infantile paralysis of last summer, occurs there is panic and consternation throughout the State, while other diseases causing many more deaths and many more cases of serious illness attract comparatively little attention. During the entire year of 1916 there were 1,100 deaths in the State from infantile paralysis, yet during the same period more than 1,900 babies less than 2 years of age died from diarrhea and enteritis. In the past 10 years more than 20,000 babies have died in this State from this one cause alone. This "summer complaint" is due to the combined effects of improper feeding and excessive heat. It is largely preventable if proper care is given to the baby. The following "Ten Commandments for Mothers" issued by the State Department of Health, if carefully observed, will prevent much unnecessary illness during the summer.

1. Give the baby its mother's milk, nature's own food, that its days may be long. 2. Feed the baby regularly, not oftener than every three hours, that its digestion may be good. 3. Keep the window open in the room where the baby sleeps, that it may have fresh air. 4. See that the baby takes its nap out of doors that it may have more fresh air. 5. Have every window and door screened and keep a net over the baby's crib and coach, that flies may neither annoy him nor pollute his food. 6. Bathe the baby every day, and if the weather is hot, several times a day, that he may be clean and cool. 7. Do not put any tight bands or other tight clothes on the baby. Let all its clothing be light, loose and soft, that it may exercise its limbs and be comfortable. 8. Do not tickle the baby, or toss it in the air, or trot it on your knee, lest it become nervous. 9. Put the baby to bed early, that it may get plenty of sleep. 10. Do not give the baby patent medicines, soothing syrup or other drugs without the doctor's advice, lest it be poisoned and die.

How They Work

In an argument against fanaticism the late General Funston said to a correspondent: "Even the looking glass and the wine glass have their uses. The looking glass reveals our defects to ourselves; the wine glass reveals them to others."

Growth of Mahogany.

The rate of growth of mahogany is shown in southern Nigeria, where the site of a town destroyed 60 years ago has been covered with a forest containing mahogany trees, some of which were found to be more than ten feet in diameter.

Unique Popularity.

"A man that minds his own business," said Uncle Eben, "is so unusual that he's liable to find no people but in on him than a regular mixer."—Washington Star.

Matches of Hemp.

In the use of early firearms a match consisted of a cord of hemp or similar material treated with niter so that it continued to smolder after it had been ignited. The match was attached to the cock of the musket and brought down by the action of the trigger on the powder priming.

Very Appropriate of Time.

A certain theater in Canada you," cried her desolator whose ability was no doubtful. One evening after a it," she answered finished "executing" a solo of the audience the light, and this title of the first thrown on the screen. "It has Been Worse."

The Serious Part of It.

"Now, my girl, don't rush hastily into marriage. Marriage is a solemn thing. I get you, grandma. I joke to go after a divorce I have spend six months getting a residence in some far-away town."

Candidate for Surrogate AT THE REQUEST OF MANY OCEAN COUNTY PEOPLE WHO HAD BUSINESS IN THE SURROGATE'S OFFICE DURING MY FORMER TERM, I CONCLUDE TO ANNOUNCE MYSELF A CANDIDATE FOR THE REPUBLICAN NOMINATION FOR SURROGATE.

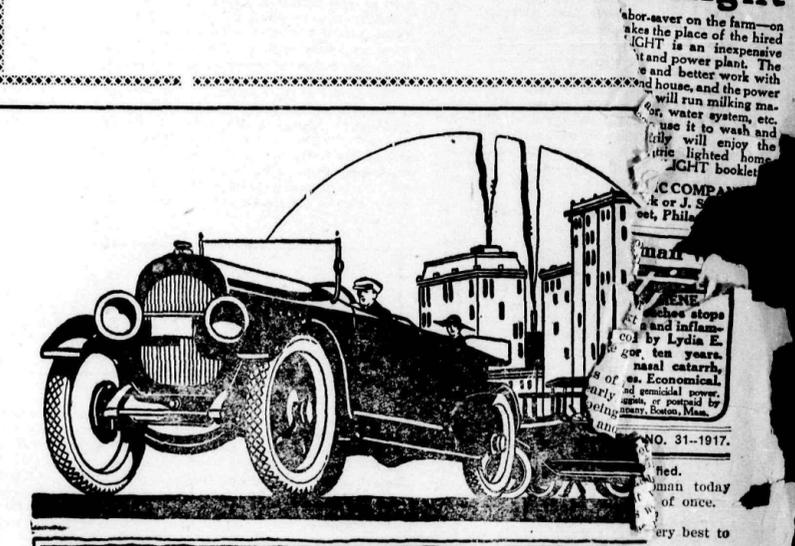

THE BUSINESS OF THIS OFFICE DEALS ALTOGETHER WITH THE INTERESTS OF OUR DECEASED CITIZENS. IT HAS HAPPENED IN SOME COUNTIES WHERE AN INEFFICIENT OR UNOBLIGING PERSON OCCUPIED THIS OFFICE, ESTATES HAVE BEEN ENTIRELY WIPE OUT, AND NOTHING LEFT FOR WIDOW AND ORPHANS; IN OTHER COUNTIES, LIKE OUR SISTER COUNTY MONMOUTH, WHERE ONE EFFICIENT AND CAREFUL OFFICER, THE DAVID S. CRATER, OCCUPIED THE OFFICE FOR 30 CONSECUTIVE YEARS, OPPOSITE CONDITION OBTAINED.

I PROMISE YOU IF ELECTED TO GIVE THE OFFICE THE SAME BUSINESS LIKE ADMINISTRATION AS IN MY FORMER YEARS AS SURROGATE. BE ON THE JOB PRACTICALLY EVERY DAY. IT IS GENERALLY AGREED THAT I WAS DEFEATED AT THE ELECTION FOR SURROGATE BY A NARROW MARGIN, BECAUSE OF THE PORT OF THEODORE ROOSEVELT. HAPPILY THE DIFFERENCES THEN EXISTED ARE NOW HEALED, AND WE ARE A RE-UNITED PARTY.

IN CONCLUSION I WISH TO SAY THAT I SHALL MAKE A CLEAN ENERGETIC CANVASS FOR THE NOMINATION. I SOLICIT THE SUPPORT OF EVERY REPUBLICAN AND INDEPENDENT VOTER IN OCEAN COUNTY THE PRIMARIES IN SEPTEMBER. I AM WILLING TO DECIDE AND ABIDE BY THEIR DECISION.

We Certainly Ought to Know When there is any question of value in automobile, we certainly ought to have the answer. For we have seen the inside of practically every automobile made. We know how much value every manufacturer intends to put into the tires he sells. We know which tires give way first. We know their weaknesses, their points of strength, their capacity for service. We know tires as your family doctor knows you—because it is our business, as vulcanizer, to keep tires in best and longest condition.
