# ARRANGE FOR MEASURES TO RAISE MONEY

## Joint Conference on War Revenue Complete Their Bill and Turn in Their Report.

### TAX LEVIES WILL BE HEAVY

Under Legislation Provided, Powerful Corporations Will Pay Their Proper Share for the Finances That Must Be Provided for the Successful Continuance of the War—Best Efforts of Statesmen at Washington Have Been Put Forward to the Accomplishment of the Country's Ends.

Washington.—The joint conferees on the war revenue bill completed their draft after two weeks of deliberation. As revised by the conferees the measure has been raised from the levy fixed by the senate of \$2,416,670,000 to an aggregate of approximately \$2,700,000,000. Chairman Simmons of the senate finance committee estimated that the increase made by the conferees would approach \$275,000,000.

**Profits Tax Modified.**  
The excess war profits tax, as agreed to by the conferees, is a modification of the senate bill, the principal changes being in the maximum and minimum rates of exemption upon which the tax is to be determined. The senate graduated scale of exemptions ran from 6 to 10 per cent, while the house exemption rate was 8 per cent. The conferees adopted the graduated rate of from 7 to 9 per cent.

The definition of capital, which was a point upon which the conferees argued for days, was modified so as to provide that the actual value of tangible property paid into a corporation or partnership for individual business before January 1, 1914, shall be taken as of that date. The proviso as to good will and other intangible property has been somewhat liberalized.

**As to "Invested Capital."**  
In calculating war excess profits the term "invested capital" of corporations and partnerships was declared to include "actual cash paid in, actual cash value and other tangible property paid for stock or shares at the time of payment or January 1, 1914, but in no case to exceed the par value of the original securities; paid in or earned surplus and undivided profits used or employed in the business, exclusive of undivided profits earned during the taxable year."

The allowance for intangible assets includes "actual cash value of patents and copyrights paid in for stock or shares at the time of payment, trademarks, trade brands, franchises, . . . for bona-fide payments not to exceed the cash value."

It stipulates that such intangible assets exchanged for securities before March 3, 1917, not exceeding 20 per cent of the total, shall be included at a value not exceeding a fair cash value at the time of purchase.

**Postal Increases.**  
A flat increase on reading matter of 3/4 cent per pound until July 1, 1919, and 1/2 cent thereafter was provided. Advertising matter exceeding 5 per cent of the total space would be taxed from 3/4 to 2 1/2 cents additional until July 1, 1919, and from 1/2 to 1 1/2 cents thereafter until July 1, 1920; and from 3/4 to 6 1/2 cents in 1921 and from 1 cent to 9 cents thereafter.

An additional tax of 1/2 cent per pound until July 1, 1919, and 1/4 cent thereafter, on religious, agricultural, fraternal and similar publications was adopted.

The 1 cent tax on letters, excepting drop letters and postal cards, was restored by the conferees. A 1 cent additional tax on postal and private mailing cards was added. The first-class mail increases are estimated to raise \$90,000,000, and are effective 30 days after the passage of the act. The senate provision exempting from postage letters written by soldiers and sailors abroad was retained.

**Railroad Tickets Hit.**  
The conferees levied 8 per cent in lieu of the senate rate of 5 and the house rate of 10 per cent on passenger transportation, estimated to raise from the compromise levy about \$60,000,000 instead of \$37,500,000 under the senate plan. The 3 per cent tax on freight transportation was retained and the tax on express transportation was increased so that 1 cent paid instead of each 25 cents. The house 10 per cent tax on Pullman accommodations, cut to 5 per cent by the senate, was restored and is estimated to raise \$5,000,000.

In lieu of the house 5 per cent tax on sales of automobiles by manu-

facturers and the senate federal license tax on owners, the conferees adopted a 3 per cent tax on all motor vehicles, including trucks, payable by manufacturers, producers and importers.

Taxes of 3 per cent of manufacturers' ales of musical instruments and jewelry also were written in, with a tax of 1/2 cent a foot on motion picture film.

**New Inheritance Tax.**  
A new system of graduated inheritance taxes was written into the bill in lieu of the house plan and despite the senate's rejection of such taxes. The new rates on inheritances, with those of Americans in military service exempted, range from one-half of 1 per cent on \$50,000 estates to 10 per cent on estates of \$10,000,000 and more.

The bulk of the increases of between \$250,000,000 and \$300,000,000 made by the conferees in the senate bill was secured from the postage, public utilities and manufacturing sales section and the new inheritance taxes.

With but few exceptions, the new taxes are effective with the passage of the act.

**Senate Version Stands.**  
The income tax section was adopted virtually as written by the senate. The new 2 per cent normal tax on incomes of more than \$2,000 for married persons and \$1,000 for single persons is in addition to the present 7 per cent normal tax on incomes of less than \$3,000 for single persons and \$4,000 for married persons. Thus those between the new low exemption bases and the present exemptions will pay only the 2 per cent tax, but single persons having an income of \$3,000 or more and married persons whose income is \$4,000 or more would pay the full 4 per cent normal tax.

The senate income provision allowing an additional exemption of \$200 for each dependent child to heads of families subject to the present law was retained. The exemption for children, however, does not apply to those subject to the new reduced taxes with the \$2,000 and \$1,000 exemptions, respectively, for married and single persons.

**Surtax Is Agreed Upon.**  
Surtaxes were agreed upon as follows:

One per cent on income over \$5,000 and less than \$7,500; 2 per cent between \$7,500 and \$10,000; 3 per cent between \$10,000 and \$15,000; 4 per cent between \$15,000 and \$20,000; 5 per cent between \$20,000 and \$40,000; 10 per cent between \$40,000 and \$100,000; 15 per cent between \$100,000 and \$200,000; 20 per cent between \$200,000 and \$500,000; 25 per cent between \$500,000 and \$1,000,000; 30 per cent between \$1,000,000 and \$2,000,000; 34 per cent between \$2,000,000 and \$5,000,000; 40 per cent between \$5,000,000 and \$750,000; 45 per cent between \$750,000 and \$1,000,000, and 50 per cent on incomes exceeding \$1,000,000.

**Increased Tax on Whisky.**  
Increased senate rates on whisky and beer were virtually retained, and that on wines somewhat reduced. The tax on distilled spirits was made \$2.10 per gallon when for beverage use and \$1 less for industrial purposes, estimated to raise \$135,000,000. The amendment prohibiting importation of distilled spirits for beverage use was retained. Floor taxes to reach withdrawn liquors were approved. Beer was taxed \$1.50 per barrel additional, to raise \$46,000,000, an increase of 25 cents per barrel over the house rate.

Present wine taxes were doubled. Taxes on nonalcoholic beverages were compromised. On prepared sirups and extracts the taxes graduated from 5 to 20 cents instead of from 3 to 12 cents a gallon were adopted. Grape juice and other soft drinks are taxed 1 cent per gallon, as provided by the senate in reducing the original 2-cent rate of the house.

Senate rates on cigars and cigarettes were retained, but those on snuff were allowed to charge the consumer, but the gross margin which the retail dealer will be allowed to add to the average wholesale cost of his coal in making retail prices.

The retail dealer will be allowed to sell coal to the consumer at a price representing an advance of not more than 30 per cent over the retail gross margin of 1915. In no case, however, is the gross margin from now on to exceed the gross margin of July, 1917. If, for example, a retail coal dealer bought a particular kind of coal in 1915 at an average of \$2 a ton and sold it to the consumer at \$3 a ton, his gross margin was \$1. Dr. Garfield now allows him to add 30 per cent to this amount, making his gross margin for 1917 \$1.30, provided that is not in excess of his gross margin in July 1915.

If the retail dealer now pays an average of \$3 for the same kind of coal he will be allowed to sell it to the consumer for not more than \$4.30 a ton. Doctor Garfield selected 1915 as a normal coal production year.

Secretary McAdoo issued the following appeal:  
"There is now offered to the American people a new issue of \$5,000,000,000 of bonds to be known as the second Liberty Loan. They will be issued in such denominations and upon such terms that every patriotic citizen will have an opportunity to assist the government by lending his money upon security of the government bond. It is essential to the success of the war and to the support of our gallant troops that these loans shall not only be subscribed, but oversubscribed. No one is asked to donate or give his money to the government, but every one is asked to lend his money to the government. The loans will be repaid in full with interest at the rate of 4 per cent per annum. A government bond is the safest investment in the world; it is as good as currency and yet better, because the government bond bears interest and currency does not. No other investment compares with it for safety and ready convertibility into cash."

increased from 4 cents to 5 cents a pound.

**Stamp Taxes Fixed.**  
Stamp taxes agreed upon are: Bonds of indebtedness, 5 cents on each \$100.

Indemnity and surety bonds, 50 cents.

Parcel post packages, 1 cent for each 25 cents of the cost of transportation.

Capital stock, original issues, 5 cents per \$100.

Sales and transfers, 2 cents per \$100.

Sales of produce on exchange, 2 cents for each \$100 value in merchandise.

Drafts, checks payable other than on sight or demand, promissory notes, except bank notes for circulation, and renewals, 2 cents for all sums below \$100 and 2 cents for each additional \$100 or fraction thereof.

Conveyance papers, 50 cents between \$100 and \$500 and 50 cents for each additional \$500.

Customs house entries, from 25 cents to \$1; entry for withdrawal from bonded warehouses, 50 cents.

Passenger tickets for ports other than those in the United States, Canada and Mexico, between \$10 and \$30, \$1; between \$30 and \$60, \$3, and above \$60, \$5.

Voting proxies, 10 cents.

Power of attorney, 25 cents.

Playing cards, decks of not more than 54 cards, an additional 5 cents on the present rates.

Taxes on life insurance, eliminated from the house bill in the senate, were amended and reintroduced, raising about \$5,000,000. Effective November 1 the new taxes on new insurance policies issued are 3 cents per \$100 or fraction thereof on life insurance and 1 cent per \$1 on the premium charged on marine, casualty, fire and inland insurances.

Amusement taxes agreed upon provide that all persons entering places of amusement free, except employees and officials on duty and children under twelve, would pay a tax rate of 1 cent on each 10 cents or fraction thereof of the admission charge. This tax also would apply to cabarets and similar performances where the cost of entertainment is included in other costs, such as service. Holders of annual box seats would pay 10 per cent of the annual rental. Nickel theaters and shows, rides and other outdoor park amusements with a maximum admission of 10 cents and benefit entertainments and agricultural fairs were exempted.

After November 1, 1917, members of all clubs, except fraternal orders, paying more than \$12 annual dues would be subject to a 10 per cent tax.

**Exemptions Are Allowed.**  
On excess profits the conferees agreed upon a minimum deduction of 7 per cent and a maximum of 10 per cent, instead of the 6 to 10 per cent fixed by the senate. Other exemptions are \$3,000 for corporations and \$6,000 for individuals. Corporations, partnerships and individuals having no capital stock would pay a flat rate of 5 per cent on net profits in excess of \$3,000 for corporations and \$6,000 for individuals and partnerships.

Miscellaneous income tax amendments inserted by the senate were generally adopted, including the so-called Jones amendment for a tax of 10 per cent on corporations' undistributed surplus, without allowance for income taxes paid. The 10 per cent tax would not apply to undistributed income actually invested or employed in business or in federal securities after September 1, 1917, and 5 per cent penalty for surplus retained but not employed is provided.

In making provision for administration and collection of the new and existing taxes the conferees provided that the special tax of 2 1/2 per cent on war munition manufacturers shall be reduced to 10 per cent, but retained in January 1, 1918. It now yields about \$20,000,000 annually and the senate had proposed its repeal.

## URUGUAY JOINS LEAGUE OF HONOR

### South American Republic Breaks With Germany and Dismisses Kaiser's Representatives.

#### PERU COMES INTO LINE ALSO

Uruguayan Congress Authorizes Executive to Adopt Measures to Facilitate Navigation in Co-operation With Friendly Nations.

Montevideo.—Uruguay, like Peru, has broken with the Kaiser. The severance of diplomatic relations came to pass after an all-night session of the Congress. It was greeted by outbursts of patriotic fervor from the public and press throughout. The measure adopted by a joint session of the Senate and House authorizes President Viera:

To break diplomatic and commercial relations with the German Empire, and

To adopt measures to facilitate navigation, in co-operation with the friendly nations, and measures to assure importation and exportation.

The President acted promptly on the first point and took immediate steps toward action on the second. In a speech to Congress he made it clear that Uruguay enters the side of the United States, not because of any particular grievance, but to align itself with the cause of liberty and justice.

Passports were issued to the German diplomatic and consular officials. Uruguay gives guarantees for their personal safety until they are out of the country. At the same time, cables to Berlin ordered all Uruguayan officials in Germany to leave for home immediately.

A note to the German Foreign Office expresses the assumption that the same guarantees given German officials in Uruguay will be given to Uruguayan officials in Germany.

**Peru Takes Action.**

Lima, Peru.—The Peruvian Government handed his passports to Dr. Peri, the German Minister.

The Peruvian Congress decided by a vote of 105 to 6 to break off diplomatic relations with Germany as a result of the sinking of the Peruvian bark Lorton by a submarine.

Action by the Congress at the conclusion of a stormy debate, Peru had demanded an indemnity for the sinking of the Lorton, but this Germany refused to pay, offering the alternative of a prize court decision.

**San Salvador Sides With U. S.**

San Salvador.—The United States Government has made an inquiry in regard to the significance of the declaration by the Government of Salvador of neutrality friendly to the United States.

The Foreign Office has replied that Salvador considers herself associated with the United States by reason of her sentiments in favor of pan-Americanism in the world struggle.

**SUBMARINES LESS MENACING.**

**Government Action Reveals Decrease of U-Boat Hazard.**

Washington.—Official announcement is made that in view of the effectiveness of methods employed in fighting submarines a reduction of nearly 25 per cent has been made in the premiums charged by the Government's War Risk Insurance Bureau on all American steamships traversing the war zone.

The reduction was made, it was officially announced, "because of the decrease in the risks." Unofficially it was regarded as the government's expression of its opinion, in terms of dollars and cents, that the U-boats have passed the zenith of their campaign of frightfulness.

## HENRY H. ARNOLD.

Foremost Aviator Who Has Aided in Planning Aerial Fleet.

It was recently announced that the United States has over 20,000 aeroplanes under construction. Major Henry H. Arnold, one of America's foremost aviators, has done a great deal of work in perfecting plans for these aeroplanes.

### BOLO PASHA'S SPY FUNDS

#### MONEY TO BUY UP FRENCH PRESS PLACED IN NEW YORK BANK.

Hint That the Entire Web of German Plottings in America May Be Uncovered.

New York.—Attorney General Merion E. Lewis, of New York, with the approval of Secretary of State Lansing and Jules J. Jusserand, the French Ambassador, disclosed the secret of the traitorous activities in this country of Paul Bolo Pacha, the Levantine financier of Paris, now under arrest in France as a German spy.

Evidence in the possession of the Attorney General shows that the man who was behind the scheme by which Bolo proposed to betray France by corrupting its public press in favor of Germany was Count von Bernstorff, then the German Ambassador at Washington, who eagerly fell in with the plans of the traitor and advanced him nearly \$1,700,000 with which to finance the plot in France.

The evidence also shows that it was through Hugo Schmidt, prominent before the war in New York banking circles, as the agent of the Deutsches Bank of Berlin, that Bernstorff advanced the money to the Levantine plotter. Adolph Pavenstater, another former New York banker of German origin, appears as a go-between for the plotting Ambassador and the spy.

According to one of the witnesses in the case, Bolo attended a large dinner at Stuyvesant, where he met, with others, William Randolph Hearst, whom he told a bank employe, he hoped to "convert."

The Attorney General has disclosed a number of prominent persons with German secret service work, and this information is now in the hands of the Department of Justice for further investigation for such action as developed facts may warrant.

**POSTAL RATES GO UP NOV. 2.**

Letters Three Cents—Postcards Two Cents.

Washington.—The Post Office Department issued these instructions: "Postmasters shall on and after Nov. 2 see that postage is paid at the rate of 3 cents an ounce or fraction thereof on letters and other first class matter, except drop letters and foreign mail."

"Postal cards are required to be prepaid 2 cents, and, therefore, the 1 cent postal cards must have a 1 cent postage stamp affixed to them in addition to the 1 cent stamp impressed on such cards."

"Postal cards (private mailing cards) bearing written messages must have 2 cents postage prepaid on them."

Washington.—Further operations of the German sea raider Seadler, now stranded and abandoned, which has destroyed or captured more than fifty vessels since last December, were revealed when a message was received from Tutuila, Samoan Islands, telling of the arrival there of the master and three sailors of the missing American schooner C. Slade, which was sunk by the raider.

**FOR STORAGE OF SEED WHEAT.**

Department Waives 30 Day Limit. Price to Be Regulated.

Washington.—To insure sufficient seed wheat and rye to sow next year's war crops, the Department of Agriculture announced that the thirty day grain storage limitation will not apply to seed grain. Lots may be kept for seed purposes until the end of the next seeding season, but cannot be sold at a price exceeding 15 per cent the selling price of No. 1 wheat at the elevator where stored.

## ADOPT WAR TAX REPORT

### No Negative Vote Is Recorded as Measure Is Sent to President.

#### WILL RAISE \$2,500,000,000

Not Even Roll Call Necessary in Upper Chamber—La Follette in Speech Against Bill Calls It Unjust and Framed Unwisely.

Washington.—At last the two and a half billion dollar war revenue bill is practically a law. It passed the Senate without a dissenting vote and went to President Wilson. Senator Simmons said the bill, which has been in Congress five months, would raise \$2,555,000,000.

There was not even a roll call on the bill. Senator La Follette finished a speech against it, calling it unjust and saying it was framed unwisely. Vice President Marshall called for viva voce vote, and in a few seconds the greatest tax measure ever placed upon any nation had been passed.

Senator Simmons, the finance committee chairman, explained that the decrease of about \$200,000,000 from the estimate of Saturday night was because of revisions. He said the increases added by the Senate and conferees changes amount to \$110,000,000, of which \$128,000,000 was inserted by the conferees.

"It is a much better bill than it was when it came from either house of Congress," he said.

There was not the slightest foundation for the charges of friction in conference, declared Senator Simmons. In fact, he said, the deliberations were "from beginning to end harmonious and pleasant."

Senator Smoot, of Utah, did not agree with Senator Simmons that the bill had been bettered in conference. "It is not better, it is worse," he said in effect, adding that he opposed the injection of new matter not approved by either House.

"I know there are not enough votes to send this bill back to conference," said Smoot. "If we had the votes I would move to recommit for no other reason than the zone system on second class mail matter. In many respects this is more vicious than when it passed the House. We penalize people for having the temerity to live beyond a certain radius. It will cost more to send a magazine to Nebraska than to Siberia."

A strong opponent of the new zone system was Hitchcock, who declared it would certainly ruin many publications, and that thing must pass on the tax to their subscribers, if they were to continue. Senator Simmons inserted in the record a letter from the Postmaster-General declaring that even with the new rate the government would lose \$40,000,000 annually on magazines and newspaper transportation.

**BUILDING 20,000 AEROPLANES.**

**Baker Announces Great Aerial Fleet Will Be Ready Soon.**

Washington.—Secretary Baker authorized the statement that work has begun on more than 20,000 aeroplanes, which are to be the vanguard of America's aerial campaign against Germany. Practically the entire number of aeroplanes and motors for which provision was made in the \$640,000,000 appropriations bill already have been contracted for.

Twenty-four flying schools have been authorized, the statement reveals, and besides the thousands training here students from the United States are training in all the allied countries, while many of them are undergoing intensive schooling behind several of the battle fronts. The men now in Europe will be turned over as finished aviators to the American troops in France.

A formal preliminary inquiry into the alleged delay of speech of Senator La Follette, of Wisconsin, made before the Non-Partisan League at St. Paul a fortnight ago, was ordered by the Senate Privileges and Elections Committee.

# WASHINGTON GOSSIP

## Cranks From All Sections Seek to See President

WASHINGTON.—The real president of the United States arrived in Washington the other day. He admitted it. "I come," he announced, as he stepped off the train from Kookuk, "to take possession of the White House. Wilson was elected by fraud. I will drive out the usurper."

"Welcome," said a cordial secret service man. "Permit me to escort you to the White House."

Whereupon the self-styled president was whisked to police headquarters. Eventually he held forth in pomp at the psychopathic ward of the Washington Asylum hospital.

In the last few months this institution has welcomed a few other presidents, the Queen of Canada (who had come to ask Secretary McAdoo for \$500,000 for coronation expenses), the Most August Oracle of the People (including Mexico), numerous crack-brained inventors, miscellaneous "chums" of the president (who just wanted to chat with him), and sundry other members of the batty battalion.

One chap—educated and ostensibly intelligent—came all the way from California to arrest the president. He ran the secret service gauntlet at the Union station and calmly walked up to the White House before guards nabbed him.

Another sage came from New York with a weird tale of the shooting of 400 German spies on the Brooklyn bridge every day. He wanted President Wilson to have the same system started in Washington.

Eagle-eyed plain-clothes men stem the tide of cranks at the Union station. Only the cleverest crank can get near the White House. And it takes a sane man to give inside.

## Why One Treasury Official Is Short on Vacation

BYRON R. NEWTON, as assistant secretary of the treasury, has had occasion to dispense a few hundred millions for the erection of public buildings. But such fiscal gymnastics are not helping him one bit when it comes to recovering that \$50 of the Newton family's money which went up in smoke a few days ago.

As a result Mr. Newton, who sits all day in the home of the greenback and talks amiably with foreign gentlemen about billion-dollar loans, faces two alternatives. Either he curtails a vacation or he floats a personally conducted Liberty loan of his own to finance a much-needed trip.

It happened like this. A few evenings ago Mr. Newton wended his way homeward to dine with his family, and Mrs. Newton called his attention to two articles of which she thought the assistant secretary was in need.

One was a pair of garters. The other was the roll of bills—\$50 worth of them. Mr. Newton seized upon the garters and thoughtfully placed the bills inside the garter box. Then Mrs. Newton proceeded to impress upon him the urgent need of the vacation.

Next morning the frugal Mrs. Newton asked if Mr. Newton had put that money in a safe place. No wife would trust even an assistant secretary of the treasury when it comes to his own household finances. Her suspicions were fully justified. Mr. Newton searched his pockets, raked his brain, and then remembered he had put the money in the garter box. And a careful maid, it was later discovered, had cast the garter box into the fireplace.

It was a case of money to ashes, of vacation to the four winds, and Byron R. Newton back to figuring on the expenditure of hundreds of millions in new taxes, but not a cent for vacation.

## Capital Crowded as Never Before in History

EVERY department of the government is engaged in drawing recruits to the national capital. More than 15,000 clerks, alone, have been brought here since the United States cast itself into the war. The regular public buildings were filled to their utmost capacity long ago.

In the big State, War and Navy building the corridors of every floor except that occupied by the three respective cabinet members are filled with desks and busy people. Outside, all over town, vacant office buildings have been rented. The other day I heard John J. Fitzgerald, chairman of the house committee on appropriations, who has much to do with the subject, declared that there was not left in Washington a single building for rent. The rents of apartment houses have joined the aviation corps, and many natives have felt compelled to seek cheaper quarters to make room for the influx of war boomers. Houses of the best grade, long a drug on the market, are now in such demand that an unoccupied one is hard to find. Before Mr. Wilson and his Democrats came here this city was the favorite refuge of the rich and the overrich. Congress had exempted all form of securities from taxation in the District of Columbia and there was no income tax to annoy one. Since this ceased to be a haven for money and also since Mr. Wilson married a widow whose husband had been "in trade" a lot of these people have abandoned their palaces and gone elsewhere, leaving their Washington windows planked and the grounds shabby.

## Recreation Keeps President Fit for Hard Work

EACH day sees the solution by President Wilson in a few hours of some great problem which in the old days before the war would have been given weeks and even months of consideration before a decision was reached.

Numerous special boards have been given special problems for solution. Seldom does any board reach a decision without the president's assistance. Usually a board will become deadlocked after considering a question for several weeks and will rush to the White House for the president's advice. Sometimes the president will go to the office of the board itself to render his assistance.

Then after the whole situation has been laid before the president he will consider it for a comparatively few hours and announce a decision. Sometimes the decision is given as that of the board. More frequently the president announces it and takes the responsibility himself.

In the whirlwind of events it probably is thought outside of Washington that the president has little time for entertainment. Nothing is further from the truth. Each morning at 8:30 he goes for a game of golf. He is away from the White House until 10:30. After a bath and a change of clothing he is ready for the day's business. Most of his work is done between eleven in the morning and one o'clock in the afternoon, when he has lunch. After lunch he receives two or three callers and then goes out for a drive through one of the city's parks.

In the evening he goes either for a drive or to the theater. One evening out of every week he spends at a vaudeville show. Another he devotes to a current theater attraction, frequently a musical comedy. Sometimes he takes a turn around the Speedway after the theater before returning to the White House.

The president accomplishes a great deal of work each day and undoubtedly he could do more if necessary. He believes, however, that a certain amount of relaxation is necessary to keep him in the best possible trim. It is only when there is business of a very pressing nature that he foregoes the theater and his golf game.

## PRESENT WALL OF STEEL TO ENEMY

American Soldiers Will Be Armed to Teeth When They Go Into Trenches.

## BAKER GIVES OUT DETAILS

One Hundred and Ninety-Two Guns and 480 Trench Knives Added to Equipment of Each Regiment in Reorganization.

Washington.—American soldiers will be literally armed to the teeth when they go into the trenches.

In addition to the usual rifles, bayonets and pistols with which the men are now armed, there will be added to the fighting equipment of each regiment 480 trench knives, 40 to each company; 192 machine guns, 16 to each company, and three one-pound cannons.

Details of the men's fighting equipment were given in a statement by Secretary of War Baker, outlining the new army organization for overseas service.

27,152 Men in Division.

The new organization increased the ratio of artillery to infantry from three to nine, as at present, to three to four. A corresponding increase is made in machine gun strength.

In addition, there are sections of sappers and bombers which have important parts to play in the new warfare.

The strength of the new organizations will be: Divisions, 27,152; infantry brigade, 8,210; artillery brigade, 5,068; infantry company, 256, and machine gun company, 178.

Each infantry regiment will have a strength of 103 officers and 8,352 men. There will be one headquarters, and a headquarters company of 313; three battalions of four rifle companies, each totalling 3,078; one supply company of 140, one machine gun company and one medical detachment of 50.

The rifle company has 250 men and six officers. It is composed of a company headquarters and two officers and 18 men, and four platoons. Each platoon has two sections of riflemen of 12 each, or 24 men; one section of bombers and rifle grenadiers of 22 men, and one section of auto rifle of 11 men and four guns.

The 178 men of the machine gun company will be armed with 12 heavy machine guns and four spare guns.

Details of Organization.

The organization of the infantry division in detail follows:

One division headquarters.....	364
One machine gun battalion of four companies.....	758
Two infantry brigades, each composed of two infantry regiments, and one machine gun battalion of three companies.....	16,430
One field artillery brigade, composed of three field artillery regiments, and one trench mortar battery.....	5,068
One field signal battalion.....	1,052
One regiment of engineers.....	1,696
One train headquarters and military police.....	327
One ammunition train.....	962
One supply train.....	472
One engineer train.....	34
One sanitary train, composed of four field hospital companies and four ambulance companies.....	849
Total.....	27,152

Each regimental headquarters will consist of seven officers and 294 men. There will be a headquarters platoon of 93, a staff section of 36, an ordnance section of 29; a band section of 28; a signal platoon of 77, including a telephone section; a sappers' and bombers' platoon of 44; a pioneer platoon of 55 for engineer work, and a cannon platoon of 33 officers and men.

Sixteen Kitchens Included.

The transportation equipment to each regiment will be 22 combat wagons; 16 rolling kitchens, 22 baggage and ration wagons; 16 medical carts; 15 water carts; three ration carts; 24 machine gun carts; 59 riding horses; eight riding mules; 332 draught mules; two motorcycles with side cars; one motor car and 42 bicycles.

There will be 14 machine gun companies to the division. Each of the four infantry regiments will have one, each of the two brigades a machine gun battalion of three companies, and the division will have a separate machine gun battalion of four companies. This gives the division a mobile machine gun strength of ten companies which can be used as special needs require, while each regiment still has its own machine gun equipment in one of its component companies. And in addition there are 48 sections of auto riflemen, each section carrying four light machine guns.

Cow Wears Glasses.

Ferdale, N. Y.—In an effort to save a cow from becoming blind, its owner, Charles Hagaman of Ferdale, who values the animal at \$7,000, has had an operation performed on the cow's eyes, and it now wears colored glass spectacles to protect it from the sun.

The cow has taken seven prizes at county exhibits in two years. Recently it contracted an ailment of the eyes that was threatening its sight. It is said the animal's condition is much improved.

Fortune From Autoists.

New Martinsville, Va.—By directing motorists to take an impassable road and then charging them \$10 to pull them out of the mud with his team a Wetzel county farmer is reputed to have made a small fortune in the last few months. Ambrose Habig, a Wheeling City councilman, who was one of the victims, says the farmer told him he could cut off several miles by taking the road.

## DOCTORS EAGER TO LEARN FROM ALLY

American Surgeon Calls Tale of Serious Differences a German Canard.

## UTMOST CORDIALITY EXISTS

Excellent Work Being Done by American Units Has Been Subject of Complimentary Remarks by British Surgeons.

British Headquarters in France and Belgium.—German agents recently have been spreading broadcast on the continent the report that serious differences have arisen between the British army medical service and the American surgeons and physicians who have been working with the British forces in France. Special publicity has been given the story by its sponsors in Belgium and France. The correspondent of the Associated Press accredited to British general headquarters has made a careful investigation of the facts, visiting not only base hospitals which have been taken over by American medical units, but casualty clearing stations in which American surgical teams are working.

The utmost cordiality exists and does exist between the British medical service and the Americans who are working with them. The assertion that there has been any quarrel between the bodies is without foundation. As one eminent American has put it:

"The story is a gross canard. The reasons for circulating it are obvious. The Germans are trying to create among Belgian and French civilians a contempt for America and Great Britain and consequently a hostility toward these two nations."

Americans Are Part of Machine.

The six medical units which were sent over from the United States to take charge of six British base hospitals have become a part of the smooth-running organization that the British have developed. The Americans feel that they are fortunate in their position. They realize that they have much to learn about war hospitals and they are having the opportunity of learning from men who have had more than three years' experience.

The British, on the other hand, recognize fully the sacrifices that have been made by the Americans, many of them eminent surgeons with big practices at home, to come to France to do their bit in caring for the wounded.

The excellent work being done by the American units has frequently been the subject of the most complimentary remarks by all ranks of the British medical organization. The service which the workers from the United States have performed is viewed as one of the bright spots in a war which is causing so much misery.

When the Germans began their ruthless sinking of hospital ships and it became apparent that it would be unsafe to try to transport wounded British soldiers and German prisoners to England, there was a hurry-up call for the establishment of more base hospitals in France. America was asked for assistance and the six units were rushed across to Europe, without stopping to bring their full equipment.

They immediately took over large base hospitals, and although the work has been handicapped in some degree because of lack of supplies, their institutions soon ranked among the best, for while the units were inexperienced in war work, they were highly trained in hospital service.

Hospitals Care for Germans.

Roughly speaking, the six base hospitals conducted by the Americans have beds for about 1,500 patients each, and there are many times when they are filled to overflowing, for base hospitals must care not only for their own wounded but for Germans as well. The six base hospitals have, in addition to their other work, furnished about ten surgical teams for service in casualty clearing stations near the firing line. These teams usually consist of a surgeon, an assistant, a nurse and an orderly.

American surgeons whose names are famous internationally are laboring beside youthful medical officers who have just under them in the classroom at home. Doctor Crile of Cleveland, Doctor Cushing of Harvard, Doctor Brewster of New York, Doctor Hart of Philadelphia, Doctor Murphy of St. Louis and Doctor Frederick Besley of Chicago—they call them majors over here—all have been or are at present working night and day in casualty clearing stations, which have been caring for the wounded from the last great offensive.

These surgical teams have had one characteristic experience. Their work is hampered and their lives are endangered by German airplanes, who persist in hurling high explosives down among them. In one of the latest raids the German aviators killed or wounded many of their own men who were prisoners being cared for in one of these hospitals.

## An Imitation Takes For Its Pattern the Real Article

There was never an imitation made of an imitation. Imitators always counterfeit the genuine article. The genuine is what you ask for, because genuine articles are the advertised ones. Imitations are not advertised, but depend for their business on the ability of the dealer to sell you something claimed to be "just as good" when you ask for the genuine, because he can make more profit on the imitation. Why accept imitation when you can get the genuine by insisting?

# Third Year of War Sees Situation of the Allies Greatly Improved

New York.—Germany's situation at the end of three years of war appears less favorable than it did either one year ago or two years ago.

She has to her credit in the last twelve months the crushing of ill-prepared Rumania and the conquest of two-thirds of that nation's territory.

But in the principal theater of war, the west, east and Italian fronts, the entente allies have shown, to the whole, a decided superiority to the central powers.

In the materials of war the nations fighting for democracy clearly have an increasing advantage over the kaiser's legions. They have defeated the enemy blow after blow which have told heavily in Germany, if not in territory.

**Germany More Desperate.**

Germany's plight is rendered more desperate than it was on August 1, 1916, by the accession of the United States and several minor peoples to the ranks of her enemies. Almost the whole world is now lined up against that nation.

Every belligerent dreads another winter of war, but Germany most of all. She lacks many things to face the rigors of a cold campaign—not only food and fuel, but wool for warm clothing and sufficient coal to run her generating stations and keep those at home from freezing.

LUKE A. COURTNEY, Collector

Dated September 13th, 1917.

Those Noisy Musicians. During the concert a man who really appreciated music for its own sake was greatly annoyed by a young girl in front of him who kept talking to the girl at his side. "What a nuisance!" snally exclaimed the appreciative man. "Do you refer to me, sir?" threateningly demanded the girl. "Oh, no, I meant the musician." They then had such a noise with their instrument that I can't hear his' your brilliant conversation."

# Third Year of War Sees Situation of the Allies Greatly Improved

New York.—Germany's situation at the end of three years of war appears less favorable than it did either one year ago or two years ago.

She has to her credit in the last twelve months the crushing of ill-prepared Rumania and the conquest of two-thirds of that nation's territory.

But in the principal theater of war, the west, east and Italian fronts, the entente allies have shown, on the whole, a decided superiority to the central powers.

In the materials of war the nations fighting for democracy clearly have an increasing advantage over the Kaiser's legions. They have dealt the enemy blow after blow which have told heavily in lives, if not in territory.

**Germany More Desperate.**

Germany's plight is rendered more desperate than it was on August 1, 1916, by the accession of the United States and several minor peoples to the ranks of her enemies. Almost the whole world is now lined up against that nation.

Every belligerent dreads another winter of war, but Germany most of all. She lacks many things to face the rigors of a cold campaign—not only food and fuel, but wool for warm clothing and sufficient coal to run her deteriorating railroads and keep her army and her people at home warm, and not to speak of the necessities of the winter weather.

The senate's vote on the long truce of changes being in the eastern front, it is minimum rates that the Russians just which the Kaiser is in the midst of a separate offensive much like that which has surprised the world in the present month.

In the 1916 drive Brusiloff pushed far within Bukovina and Galicia and crossed the borders of Hungary. He took about 850,000 prisoners, mostly Austrians, and forced the enemy to concentrate masses of reliable German troops, aided by a few Turks, to check him.

The real reason his drive came to a halt, however, we know now was lack of ammunition, failure of transport, treason within the czar's armies and wretched bureaucratic inefficiency. These handicaps seem to have been removed from the courageous Muscovites, perhaps for all time.

**Unfortunate Rumania.**

Rumania declared war on the Teutonic powers August 27 and immediately invaded Transylvania, where the weak Austrian guards were easily pushed back and the important cities of Hermannstadt and Kronstadt were soon in the invaders' hands.

The Kaiser sent Von Falkenhayn, a splendid strategist just displaced by Von Hindenburg, as chief of the great general staff, to command on this front, while Von Mackensen headed the Germans, Bulgarians and Turks, who threw themselves on Rumania from the south.

The Rumanians proved no match for the combination of foes. Skillful work by German spies, or the treachery of certain members of their own army, put the Rumanians' plans of campaign in the Teutons' hands, if not divulged. Bucharest fell December 6, and ten days later all Walachia was lost. On December 18 Russian troops took over the whole Rumanian front, and a few weeks later the Teuton advance was checked along the line of the Sereth and Danube rivers.

**Somme Battle Continues.**

In the west, however, Germany was facing a far different problem from the poorly outfitted and trained Rumanian peasants. When the third year of the war opened the battle of the Somme was still going on vigorously, with the French and British showing a constantly growing superiority over the foe. Bit by bit through the summer and autumn the ground was wrested from the Kaiser's men until the coming of winter smothered the offensive "in mud and blood," and, according to the British commander, Sir Douglas Haig, saved his opponents from an immediate great enforced retirement.

On September 22 it was announced that the French and British had taken 55,800 prisoners in the Somme battle between July 1 and September 18. This total was later considerably increased.

**French Win at Verdun.**

At Verdun, too, the Germans suffered. The French in battles of the fall and winter won back most of the ground lost in the offensive of the spring of 1916 and captured more than 15,000 prisoners, with slight losses themselves.

The spring campaign in the west opened this year with the Germans falling back from the great salient spearhead directed at the British, confessing thereby either their weakness or their aversion to a further offensive, although at the time German writers hinted darkly that Von Hindenburg "had something up his sleeve."

The "strategic retirement" began about March 17, and the Teutons triumphantly declared it would prevent an allied offensive this year. But they spoke too soon.

On April 9 the British stormed high Vimy Ridge, taking on this and succeeding days about 12,000 prisoners. The other enemy stronghold along the British line was Messines Ridge, south of Ypres. This the British blew up by mines June 7, the noise being heard in London. They captured 5,000 prisoners the first day of the offensive and many others later.

**French Gain Hills.**

Below the sector of the German retirement the French were equally successful. On April 10 they started a great offensive which resulted in the dominating "Hindenburg" falling into their hands, besides important positions in Champagne. Their prisoners the first two days totalled 17,000. On May 6, along the Aisne, they took 6,100 captives and gained points which they looked down on the foe, as the British did farther north.

It should be noted here, however, that the French losses were severe, resulting in the replacement of Nivelle as commander in chief by Petain.

The last twelve months in the Italian campaign has witnessed a series of costly reverses for the Austrians, but the Italians have been prevented from following up their successes by the very difficult terrain, the beaten Teutons falling back after each defeat to new mountain positions most difficult to attack.

**Italians Take Gorizia.**

On August 8, 1916, the Italians stormed the stubbornly defended Gorizia bridgehead, on the Isonzo river, taking about 10,000 prisoners, and

## Let Us Print Your Sale Bills

When it comes to neat and effective printing of any kind we will guarantee to give you satisfaction.

Those Noisy Musicians. During the concert a man who really appreciated music for its own sake was greatly annoyed by a young fellow in front of him who kept talking to the girl at his side. "What a nuisance!" finally exclaimed the appreciative man. "Do you refer to me, sir?" threateningly demanded the fellow. "Oh, no, I meant the musicians. They keep up such a noise with their instruments that I can't hear half your brilliant conversation."

Most Deadly of Diseases. The fact that the germ of the pneumonic plague is a relative to the bubonic germ and that no one knows how it becomes pneumonic, as a specialist has declared, make very little difference to the sufferer from the disease, for it is said to be about 100 per cent fatal. It is the plague which killed off 25,000,000 Europeans in the fourteenth century.

Not United States Invention. It is generally thought that the popular split bamboo fishing rod is a United States Invention. This is an error, for the first split bamboo rod was made c. three pieces "rent and glued" by William Blacker of London, England, and placed on exhibition at the Crystal Palace in 1851, while the first made in the states was the work of Sam Phillipi, a gunmaker of Easton, Pa., about 1850.

**NOTICE OF ELECTION**

NOTICE IS HEREBY GIVEN THAT A PRIMAR ELECTION will be held in Ocean County on Tuesday, September 25, 1917

for the nomination by a direct vote of the people of candidates for Sheriff, Surrogate, two Coroners, County Collector, Member of General Assembly, and borough and township officials, the latter pursuant to the calls of the several boroughs and township clerks to be voted for at the general election to be held on Tuesday, November 6th, 1917, and also to elect members of the State and County Committees of the two political parties entitled under the law to hold official primaries.

Notice is hereby given that an election will be held in Ocean County on TUESDAY, NOVEMBER 6, 1917 at which candidates for Member of General Assembly, Sheriff, Surrogate, two Coroners, County Collector, and borough and township officials, the latter pursuant to the calls of the several borough and township clerks, will be voted for.

In Municipalities Under 5000 In pursuance of the provisions of the election laws of the State, notice is hereby given to the voters of municipalities in the county of Ocean having less than 5000 inhabitants that the Boards of Registry and Election will meet for organization on the 4th day of September, 1917, at places within their respective election districts, to be designated by the members of such Board, or a majority thereof.

That said Boards of Registry and Election shall also meet on the second Tuesday of September (September 11, 1917), and shall make up the registry by a house to house canvass, as now provided by law.

On September 25th, 1917, between the hours of 7 A. M. and 9 P. M. the District Boards in all municipalities shall meet at the place where the general election will be held to conduct a Primary Election and also to revise and correct the registry.

That said Boards of Registry and Election shall also meet on the Tuesday next preceding the general election (October 30th, 1917), from 1 to 9 o'clock P. M., for the final registration of voters. Said meeting shall be held at the place where the general election is to be held, and shall be for the purpose of revising and correcting the original registers, of adding thereto the names of all persons entitled to the right of suffrage in that election district at the next election who shall appear in person before them or shall be shown by the written affidavit to be a legal voter therein and of erasing therefrom the name of any person who after a fair opportunity to be heard, shall be shown not to be entitled to vote therein by reason of non-residence or otherwise.

And notice is hereby given that the County Board of Election will sit at the Court House at Toms River, N. J., from 8 o'clock in the forenoon to 5 o'clock in the afternoon on Friday, September 14th, 1917, for the purpose of revising and correcting said primary registry list.

And notice is hereby given that the County Board of Elections will sit at the Court House at Toms River, N. J., from 8 o'clock in the forenoon to 5 o'clock in the afternoon, on THURSDAY, NOVEMBER 1st 1917

and on SATURDAY, NOVEMBER 3rd, 1917

for the purpose of adding to the various registry lists of the county the names of persons that may have been inadvertently or improperly left off the registry lists, but any such persons left off the registry lists must apply to the County Board of Elections in person, and present evidence that he is entitled to be placed on the registry list.

Dated at the office of the County Board of Elections, the 25th day of August, A. D. 1917.

**"Draw" Shots**

The flights of golf balls in the air are similar to the flights of billiard balls on a table governed by the same law.

Golf ball is precisely the same as a draw shot in billiards. The polished ivory needs the rough surface of the felt to produce resistance, and the tenuous air needs the corrugated surface of the golf ball for the same purpose.

**Barnegat**

John C. Bennett, of Mayetta, was a recent business caller. Joseph Smith of Waretown, was a recent visitor in town.

Mrs. Roy Cox and daughter are spending the fall and winter with her parents. They have rented their bungalow to the principal of the Barnegat High School.

40 Tickets were sold at the station for the excursion to Mauch Chunk and Glen Onoka.

Carlton Baker, of Co. D. 311th Infantry, spent Sunday with his mother, on Brook street. Carl looks as if the military service agrees with him.

Cornelius VanVorst, of Cedar Run, was a recent caller on friends in town. W. B. Sprague, of Manahawkin, was a business caller the past week. Raily day services were held, on Sunday last, at the M. E. Church.

Both the morning and evening services were under the leadership of Rev. Thomas H. Hicks. The services were well attended and the officers deserve praise for the pleasing entertainment.

Mrs. J. H. Webb, of Tuckerton, has been visiting Lizzie Randolph, on Main street.

C. K. Sprague, of Trenton is visiting with his sister.

Thomas S. Cranmer has purchased the Bedine property, corner Bay street and Maple avenue. A very desirable property.

Austin Cranmer has moved from Brook street to the Woodmanson property on Main street.

On Thursday evening last the combined Bible Classes of the women's and men's of the M. E. Church, held their social in the lecture room of the church. After the business meeting a social evening was spent. Refreshments were served by the ladies of the church and a pleasant and enjoyable evening was spent. Both classes are growing and are in a prosperous condition.

Remarks were made by the pastor Rev. Thomas H. Hicks and Rev. Pinfield. All report an evening well spent.

George Hopper and wife motored to Philadelphia and Trenton and spent Monday and Tuesday.

Clarence Brown, of Camp Dix, spent the week end here. A. W. Kelly, Cashier of the Barnegat Bank, has returned from his vacation spent at Long Branch, Camp Dix, and other points of interest.

musical organization of some kind is needed. There is nothing will stir you up more than a Pipe and Drum Corps, which is very inspiring.

One of the social events of the season was the marriage of Miss Lulu Lewis, of this place, and Joseph Paul Bowker, of Jersey City, held at the home of the bride's mother, Mrs. Retta Lewis, on Maple Avenue, on Wednesday, October 3, at 2:30 P. M., by the Rev. Thomas H. Hicks.

**New Spinsters Get Their Name.** From the early ninth century to the end of the middle of the nineteenth century, spinning was the chief occupation of woman. A young woman was called spinster because she spun. If she became married she did, as a matter of course, take her married title, but if she remained unmarried she continued to be called spinster. From this has the name spinster survived for the torment and pleasure of old maids today.

**Bird Spider.** Whether or not the bird spider actually eats birds has not been established. It is called a bird-eating spider, but has never been detected attacking or eating its supposed prey, nor have any traces of its food been discovered in its burrows. Its body is about two inches long, black and very hairy. Counting legs and all, it is about a foot in diameter. Its habitat is tropical and subtropical America.—Philadelphia Ledger.

**Oldest of Brazilian Cities.** Bahia, once the capital of Brazil, is still in many ways the center of art and religion in that largest of South American republics. She is the oldest of Brazilian cities and those of her present inhabitants who are descended from a long line of natives of the place—as many of them are—look down on Rio and Sao Paulo as upstarts and parvenus among municipalities.
