

TUCKERTON BEACON

VOLUME XXXIV.

TUCKERTON, OCEAN COUNTY, N. J., THURSDAY AFTERNOON, JUNE 1st, 1922

NUMBER 44.

Tuckerton Athletic Club Opens New Field and Defeat Hammonton

LOCAL HIGH SCHOOL OUTCLASS-ED BY BARNEGAT HIGH IN OPENING GAME OF DOUBLE BILL.

LARGEST CROWD TO ATTEND BALL GAME IN TUCKERTON

STEEL PITCHING FOR TUCKERTON FANNED NINETEEN HAMMONTON BATTERS IN FINAL TILT.

ALL MEMORIAL DAY EVENTS WELL PATRONIZED AND SUCCESSFUL.

The Memorial Day events were exceedingly successful and the beautiful weather was a big help in entertaining the big crowds who were in town for the day.

The parade and memorial services at the graves of departed comrades, by the G. A. R., American Legion, Junior Mechanics and school children, was the first order of the day. The speakers were Rev. Joseph Breen of West Creek, Rev. T. P. Price and Rev. Daniel Johnson of Tuckerton.

Mrs. Margaret Lippincott spoke in behalf of the erection of the new Cemetery Fence.

The festival held by the Women's Civic Club was well patronized and a neat sum was the result of their efforts.

More contributions received during the day and week for the Cemetery Fence Fund were:

Thomas Kelley, Sr. \$3.00
Mrs. John W. Grant 5.00
Mrs. Agnes Shourds 3.00
Clarence Ireland 3.00
(2nd contribution)

James O. Horner 5.00
Thomas Speck 10.00
Frank Taylor 10.00

The Tuckerton Athletic Club opened the New Athletic Field on Memorial Day with the Hammonton team. The game resulted in victory for the home team—score 13-1.

J. L. Lane, president of the Club, made the opening address, followed by a parade to the flag-pole and the flag raising. The American Brass Band of Hammonton furnished appropriate music. The four teams—Barnegat High School, Tuckerton High School, Hammonton and Tuckerton Athletic Club, with the Band in the center formed a long line and marched back to the Grandstand.

The new field is the biggest and best of any along the shore and every Tuckertonian should be proud of it.

The first game was an easy victory for the Barnegat High School, score 12-3.

The game between the Hammonton team and the Athletic Club finished with Hammonton on the short end of a 13-1 score.

For three innings Wood and Steel engaged in a pitching duel, but in local half of the fourth inning King opened with a single. J. Webb neatly sacrificed him to second, Price drew a free ticket to first, Bishop forced King at third, Steel singled and King registered the first run of the game; Ireland hit for two bases, scoring Bishop and Steel, C. Webb hit for two bases, scoring Ireland, Brown ending the rally by lining out to second. That ended the pitching duel, the locals kept right on hitting, while Steel continued to pitch good ball. King opened the fifth with a three-base hit to left and scored on J. Webb's fly to center. In the sixth, the locals added another run, Steel singled, Ireland forced Steel at second, Ireland stole second, C. Webb's single scored Ireland. In the seventh King was safe on an error by Sharp-

less, King stole second, J. Webb's single scored King, Webb taking second on the throw home; Price singled, scoring J. Webb, Steel's single scored Price. Hammonton sent out a left hand pitcher in the eighth. Sprague drew a walk-over and stole second, King singled, scoring Sprague, Somers batted for J. Webb and flied out to short field. Graf batted for Price and singled, scoring King; Bishop walked. Graf and Bishop worked the double steal and scored on Ireland's single.

Hammonton scored their lone run in the eighth, Marinelli walked and stole second, Mains struck out, Cappuccio went out Sprague to C. Webb, Marinelli took third on the play, Sharpless singled, scoring Marinelli; Macci fanned.

The game was witnessed by a crowd of a thousand people. Several of the boys of the old team were there and the old announcer, Charles H. Horner was present and announced the batteries. James V. Ludlow was the umpire in chief and Howard Falkenburg umpired the bases. The Tuckerton team was represented by J. Wynne Kelley, manager; J. E. Falkenburg, Assistant Manager; "Bumps" Ireland, C. Webb, Fred Brown, Edward Sprague, Paul King, J. Webb, G. M. Price, James Bishop, L. O. Steel, "Skinny" Somers, Allen Graf, George Culver, Joe Bolton, Edward Hoffman, Horace Stevens. This is convincing evidence of a good team this year and good games the balance of the year.

Nert Saturday's game will be with Germania. Come out and see a good game.

The box score follows:

LOCAL NEWS

Mr. and Mrs. Joseph Burton of Camden, were recent visitors.

Miss Minnie Honer spent the holidays in White Haven and Philadelphia.

Mrs. Minnie Dawson has purchased a Studebaker automobile of F. Brannin Atkinson.

Mrs. James Stevens of Brant Beach, spent a day with relatives here.

Fred Shinn, of Brant Beach, was a visitor in town on Tuesday.

Roy Byrnes spent the week end in Philadelphia.

William Jones of Atlantic City, spent Tuesday with his family here.

Mr. and Mrs. Thomas Gifford, Mr. and Mrs. Arthur King and son of Beach Haven, were holiday visitors in town.

Homer Marshall of Philadelphia, spent the week end with his parents, Mr. and Mrs. S. H. Marshall.

Joseph J. Pharo has arrived at his home here for the summer. We are glad to see the big house open.

Mr. and Mrs. Wood and son, Ellis, Mr. and Mrs. Bergman and daughter Frances, of Berlin, were Memorial Day guests of Mr. and Mrs. C. Harvey Smith.

The regular monthly meeting of the Women's Civic Association will be postponed until Friday, June 9th, when the meeting will be held at 3 P. M. at Borough Hall.

Jack Piper was a visitor at his home in Medford over Memorial Day.

Mr. and Mrs. Arthur Kauffman of Oaklyn, were holiday guests of the former's brother, Conrad Kauffman.

Mr. and Mrs. Elmer Ayers of Philadelphia are here to spend the summer with Mr. and Mrs. C. H. Ellison. Mr. Ayers is an electrician with the Ocean County Electrical Construction Company.

There will be a meeting of representative women at the Borough Hall at 2 o'clock Tuesday afternoon, next, June 6th. This meeting is called at the request of Miss Wiseman of Morris county, who is desirous of forming a unit of the Republican Club in Tuckerton. Will you be present? Everyone Republican woman in Tuckerton should. Don't forget the date and place of meeting.

E. M. BERRY ROBBED BY GYPSIES THURSDAY

Band Caught and Jersey Justice Applied in Short Order.

Last Thursday a band of gypsies in two automobiles stopped at the Eckardt store on West Main street and during a pilfering campaign one of the women stole a \$20.00 note from the pocketbook of Ephraim M. Berry. The band was caught on Lng Beach by Under-Sheriff A. W. Brown, and at a hearing before Justice Arthur C. King, were made to pay the money back and all costs, amounting to \$40.15.

NOTICE OF FRIENDS' MEETING
A religious meeting under the care of a Committee of Society of Friends will be held in the Friends' Meeting House in Barnegat next First day (Sunday) June 4th at three o'clock P. M. Standard time.

Prominent members of the Society will be present.

All persons are cordially invited to attend.

Obituary

Adaliza C. Lane
Mrs. Adaliza C. Lane, widow of the late Nicholas V. Lane, died at her home here Monday evening after a long illness. She was born at Lower Bank February 11th, 1846 and was 76 years of age.
Mrs. Lane leaves three children, Mrs. Mary L. Broome, of Beach Haven; Dr. J. L. Lane of Tuckerton and Miss Abigail M. Lane of Englewood. Funeral services were held today at 1 P. M. Interment at Tuckerton.

WEST CREEK

An address on the "Trials and Triumphs of Faith" or Christian Work on the Isolated Islands of the Sea will be given in the West Creek Methodist church next Sunday evening by Rev. R. A. Cate. The address is replete with incidents experienced and are illustrative of special providence calculated to convince the most skeptical, who in view of dark dispensations of Providence that seem to be beyond our comprehension are asking "Where is God?"

The address is given under the auspices of the Ladies Aid Society and the free will offering will be donated to the society.

Preaching at the West Creek Baptist church by Pastor Joseph Breen. Morning theme "Christ's Cry of Victory" and in the evening, "The Seven Wonders of the World." Preaching by Pastor Breen at Manahawkin Sunday afternoon right after Sunday School.

SUNSHINE SOCIETY GAVE FINE PATRIOTIC ENTERTAINMENT

An excellent patriotic entertainment was given at the Palace Theatre Monday evening under the auspices of the Sunshine Society of the Presbyterian church. It was considered by many, who witnessed the performance, to be one of the best of its kind ever given in Tuckerton.

The program was in charge of Mrs. T. Wilmer Speck, who with her very able assistants, deserve much praise.

New Gretna

Mrs. M. A. French of Atlantic City, was a visitor in town on Monday.

Mrs. Walter Mathis of Camden, is the guest of Miss Ida Mae Mathis.

OLD HOME DAY AT NEW GRETTA ON MEMORIAL DAY

Under the direction of the New Gretna Old Home Society, which was recently organized in Atlantic City, assisted by local committees, the Second Annual Old Home Day reunion was an unqualified success. Early in the day guests began arriving, from Atlantic City, Jersey City, Philadelphia, Hammonton, Mount Holly, Tuckerton, Beach Haven and many other places to which have migrated the sons and daughters of New Gretna. It is estimated that somewhere in the neighborhood of seven hundred were present. The gift awarded to the person coming the longest distance especially to attend the reunion being awarded to Mrs. Taylor of Hampton, Va.

After the decoration of the soldiers' graves in the morning under the direction of the local branch of the W. C. T. U. assisted by the pastors of the two churches, the address of welcome was made by the Rev. Andrew Richards of the local Presbyterian church and the response was made by S. H. Headley of Atlantic City. Addresses were also made by Revs. Drs. Mellen and Neal of Atlantic City; Dr. Maroney, who is director of the Physical Education of the Atlantic City High School; Maja C. Mathis, Supervising Principal of the Florence Township school, Dr. Clarence Garrabrant of Atlantic City, Leonard D. Algar, president of the Atlantic City society, Kirk Loveland, Boardwalk Superintendent, Atlantic City, Ebenezer S. Mathis of Haddonfield, former Mayor A. A. Berry of Asbury Park, and a host of other prominent products of New Gretna.

A program of music and other entertainment was enjoyed in the hall at night at which time the orchestra, brought from Atlantic City, added much to the festivities.

It was a day spent in greeting and being greeted by many friends of our youth and a great deal of appreciation is due to the committees who did so much and labored so hard to make the reunion the great success that it was.

Mr. and Mrs. J. Emory Cramer of Trenton, are visiting Mr. and Mrs. S. Cramer this week.

Mrs. John S. Mathis spent several days last week in Philadelphia on a shopping trip.

Mary S. Leek is now able to be out in a car after her recent illness.

A number of bandits have been plying their nefarious trade around these parts recently, and have robbed the stores of J. Q. Post and Karl Selig. Last Thursday night, when Kirk Loveland and family were returning to Atlantic City after visiting this place planning for Old Home Day, an attempt was made by four bandits on the meadow road to hold him up. Mr. Loveland saw them in the road, stepped on the accelerator, and as a result ran down one of them. A shot was fired tearing a hole in the rear curtain of his car. County Detective Ellis Parker was in town last week and looked into the situation.

Mrs. Elizabeth Austin of Camden, has returned home after spending several days visiting Mrs. Joseph Mathis.

Rev. Andrew Richards spent Thursday and Friday last in Pt. Pleasant and Mantaloking. While in Point Pleasant he attended a Supper-Conference of the Presbytery of Monmouth to plan for the Evangelistic program of the Presbytery during the fall and winter months. Before coming to New Gretna Mr. Richards preached in the church at West Mantaloking and called on many friends.

Mr. and Mrs. Morris C. Darby of Jersey City, arrived in town last Friday as the guests of Mr. and Mrs. Caleb A. Mathis.

The quarantine was lifted from the home of Clarence G. Mathis on Saturday, the children having completely recovered from scarletina.

Memorial was very fittingly observed in the Presbyterian church last Sunday evening when the minister preached a sermon especially suited to the occasion. The church was tastefully decorated with the national flags. One of the surviving veterans in town of the Civil war, Caleb J. Mathis, was the honored guest at this service.

Mrs. Ashton Lamson spent the 30th at the old home with her father.

Mrs. Roy Mathis has been ill for several days the past week.

BEACH HAVEN

Contractor Berry's men are at work moving the city lock-up to make room for the erection of the power house for the new electric light plant. Mr. Berry has the contract for the power house.

Mr. and Mrs. Richard Lamb of Mt. Holly, proprietors of the Beach Haven house came last week and have opened their house for the season.

Miss Eleanor Walker has resigned her position in Trenton and has come home to spend the summer with her mother on Fifth street.

Mr. and Mrs. Hirie Parker of Parkertown, were recent guests of Mr. and Mrs. Charles Parker.

Mr. and Mrs. Thomas Hanson, caretakers at the Little Egg Harbor Yacht Club, came on Saturday to open up the house for the season.

Mrs. Bertha Zumeta has returned home after spending a week with Miss Elsie Cook in Rutherford.

Memorial Day was spent quietly here. Many of our people went to the mainland to decorate the graves of loved ones; nearly all the young people who have positions in the cities were home with their friends for the week end and holiday and a large number of the cottagers came down last week, some bringing parties of friends and spent several days at their cottages.

Sheriff Holman was a visitor in town on Saturday.

Interesting memorial services were held in the Kynette M. E. Church on Sunday evening; pastor Raymond L. Cooper delivering an eloquent sermon. Next Sunday the summer schedule will begin; Sunday School at ten in the morning, preaching service at eleven, daylight saving time.

At a meeting of the stockholders of the Long Beach Bridge held in the Fire House on Saturday last, the shareholders had their stock paid for by the state, and the company was dissolved—the state taking possession in early spring.

BUSINESS BACKING

If you hope some day to engage in a business of your own—NOW is the time to establish relations with this bank.

Though your start be modest—when the time comes you will have your bank account as a basis for capital and credit.

HERE you will find a bank large enough to serve your needs yet not too big to appreciate the small account.

THE BEACH HAVEN NATIONAL BANK

BEACH HAVEN, N. J.

THE FIRST NATIONAL BANK

Member Federal Reserve System
BARNEGAT, N. J.

PURPOSE

This bank has one unalterable purpose—and that purpose, we hope, is your purpose—to help this County realize its maximum prosperity in such a way that all may share it

A bank is like a great power house. When it throws in the clutch, gets the community point of view, and goes out to accomplish things it becomes a great generator of public good. Thousands of people here have caught the spirit of this bank—have discovered that it is a public spirited institution with a public service program. They have come in with their deposits so that we could work together. If you aren't one of them of course you will be sometime. That's why this is directed to you—we want your co-operation.

THE BIG MUSKEG

By
VICTOR ROUSSEAU

WHEN NATURE FROWNS.

Nature is not a genial old dame, nature writers and poets to the contrary notwithstanding. She will give freely, but she always watches for a chance to get even. Beg of her and she is cruel as the grave. She pardons no mistakes, and always she resents man's intrusion into her wild places.

Muskeg is North American Indian for a marsh, swamp, tussocky bog. It's generally a bad place for travel. This Big Muskeg was crossed here and there by trails, but was never stable, contained a river of ooze and had unbounded depths. Nature had apparently stuck it right there to stop the Missisquoi Extension from going farther.

So around the Big Muskeg revolves a thrilling story of Canadian railroad building—a fight against the hostile forces of nature. Extremely interesting are the side lights on the life of the North. Best of all there's a fascinating story of the loves and passions of the strong men and women who are conquering the wilderness.

Victor Rousseau knows life from experience. He has been a student in England, a fighter in South Africa, a newspaper man in the United States. He is the author of many novels and his public is large.

CHAPTER I.

A Bolt From the Blue.

Eighteen below; fair weather for December in New Manitoba, where the forest, though it chills the soil till midsummer, yet shuts out the razor-edge of the winds that make the prairies, farther south, an icy inferno.

Here the bush, which had seemed to stretch out illimitably, thinned into bedraggled patches among the up-cropping rocks. A little farther and it began once more; the break was like a great, curving arm thrust into the heart of it, as if some giant fingers had plucked up the trees in handfuls and scooped the foundation from the frozen soil, and then had been withdrawn, leaving the imprints of the great finger-tips.

These finger-tips were huge sink-holes, sometimes filled with water, so that they formed clear lakes; more often sodden sponges of decayed vegetable matter, oozy, treacherous and unstable. The finger-lines were the circular ridges marking the subsidence of the mud. The thumb was Big Muskeg, which the two men who stood on the top of the humped-back ridge could see extended beneath them.

Big Muskeg, at this point less than half a mile across, was everywhere of unbounded depth. It curved and wound, a river of ooze, now broadening into chains of lakes, now narrowing into gullies; here and there crossed by trails, but never stable, nowhere offering firm foundation for the permanent way of the Missisquoi railroad.

The Missisquoi was a branch line, feeding the new road that was pushing northward toward the ports-to-be on Hudson bay. It linked with it at Clayton, whence it was being extended eastward into a virgin wilderness. Joe Bostock had secured his capital, but he had no competitors.

And slowly Missisquoi, with its small shareholders and limited means, had gone ahead. The first location parties had cleared a road to Big Muskeg. The rails had been laid halfway. But that was all, save for the partly constructed sheds and buildings for the workmen there, and the sheds for the construction material that had not yet been freighted in.

Joe, standing with legs straddling the top of the ridge, turned to Wilton Carruthers, the chief engineer of the company, with eyebrows arched and humorous inquiry on his weather-beaten old face. There was no need for speech at that moment, because the mind of each man dwelt on the identical problem.

The two men had come east by dog-sleigh, accompanied by two half-breeds, Jean Passepartout and Papiilon, the one in charge of the dogs, the other carrying the transit-compass. They had camped seven miles back on the preceding evening, and had set out at daybreak to survey the swamplands from the ridge. For the problem which had suddenly risen up to confront them clamored for solution before construction could be carried forward, and on its solution depended the future of the Missisquoi.

With the physical eye neither Joe nor Carruthers could hope to accomplish anything. Wilton was seeking inspiration, though he did not know it.

Theoretically he was endeavoring to discern some place where a foundation might be coaxed above the unstable, quaking surface with trestling and crib-work, a crossing that combined the least possible deviation of route with no more than four-fifths of one per cent of grade and four degrees of curve.

Actually and unconsciously he was seeking to interpret the natural convulsion which had, in time immeasurably remote, cloven the ridge of the land and set the swamp seeping into the fissure.

If he could read the meaning of that convulsion, understand the mind and mood of the great Architect, he could see, as if clairvoyantly, just where the Muskeg lay thinnest on the roots of the hills, where ballast would appear

the soonest above the sucking swamp. But he could read nothing.

Joe Bostock wrinkled his eyes against the sunlight.

"That's what I was thinking, Wilton," he said. "But it's got to be done. Somebody'll build it some day if the Missisquoi doesn't."

That was the nearest speech to despair that Joe, invincible, exuberant optimist that he was, had ever made. Weeks, months of resurvey must ensue, with work halted, and the Missisquoi's precarious capital diminishing to vanishing point, while the story of the lobbies of the provincial legislature, filled with bland, jeering, ill-conditioned men to whom one day's tramp such as their laborers performed would mean apoplexy.

Their faces haunted Wilton. He remembered half a dozen whom he had approached when the Missisquoi scheme was first broached. There was, in particular, Tom Bowyer, of the New Northern line, his many interests entrenched behind the bulwarks of political influence. Joe Bostock had suggested an amalgamation in the belief that Tom Bowyer could wreck the bill in the legislature. But Tom had laughed in Joe's face, and had not even opposed the measure.

"Go ahead with your muskrat line, Joe," he had said. "I won't hinder you."

The surveyors who made the preliminary reconnaissance had shirked their work and lied. Wilton suspected that most of them had been in Bow-

Joe Bostock Laid His Hands on the Other Man's Shoulders.

yer's pay. Bowyer and Bostock were old rivals. They had reported Big Muskeg to be an insignificant swamp with a firm underbed about the portage. It could be crossed, of course, in the end, since nature always yielded to man. But the Missisquoi must either swing a huge loop around it, through territory unsurveyed, or set to itself the task of filling those unbounded depths with thousands of tons of rock.

"D—n you!" said Wilton, shaking his fist toward the valley. "We'll beat you yet. We've made a bad blunder, Joe. Crooked work, without doubt—though I can't imagine why Bowyer's gang should take the trouble to hurt us unless, of course, they guess—"

Joe Bostock shook his head. "No, they haven't guessed that, Wilton," he answered. "I'll stake my hat on

that. There ain't nobody except me and you and Kitty knows. It's just bad luck, Wilton—"

Joe could never sense treachery nor bring himself to believe in its possibility; and if that weakness had kept him, in the main, a poor man, it had bound his friends to him with unbreakable bonds.

"At the best it's gross negligence," said Wilton. "Those surveyors scamped their work. I accepted their reports. I couldn't go out with the transit and aneroid and follow them all up to check their results. But I might have sounded Big Muskeg. I didn't." His voice choked. "Joe, if you have any sense, you'll fire me first," he said.

Joe Bostock laid his hands on the other man's shoulders and the humorous smile came on his face. "Well, I guess not, Wilton," he said. "You ain't to blame. You've done all that mortal man could do. The Missisquoi couldn't have been built at all without you. Fire you? Why, Kitty'd have my life if I dared suggest such a thing."

Wilton frowned involuntarily at the reference to the pretty young wife whom Joe Bostock had married in Winnipeg the year before. Joe's first marriage had been unhappy; it had been long ago, and Wilton knew there had been a separation, though Joe was always reticent about that.

Kitty was five and thirty years younger than Joe, and she had intervened into a fast friendship of more than a decade between Joe and Wilton. It made a difference, as it always does, though Joe had sworn it should not, and Kitty thought the world of Wilton.

Wilton could never understand his secret feeling about Kitty. She was devoted to Joe. Perhaps that was what lay beneath his latent antagonism toward her. He was jealous of her. He was jealous of a woman's love for Joe.

"I guess not," said Joe Bostock again, pressing his hand hard down on Wilton's shoulder.

And, in that instant, Wilton heard the crack of a rifle, and felt a violent blow on the upper part of the left arm, which knocked him to the ground. As he fell, Joe Bostock pitched forward upon him.

Twice Joe's lips quivered, as if he was trying to speak. Then the lower jaw dropped and the eyes rolled upward. A grayish pallor crept over the face.

Wilton saw that Joe's mackinaw had a tiny tear in it, over the breast. A trickle of blood seeped through the cloth. He wrenched the garment open with his right hand, pulled up the sweater, and tore the shirt apart. The heart, fluttering like a wounded bird, stopped under his hand. Joe sighed once, but he never stirred again.

The bullet had passed clean through Joe Bostock's heart from the back. And, as he tried to raise Joe's body, Wilton realized that the same bullet had broken his left arm, which hung limp from the shoulder.

He sprang, to his feet, a mad wrath giving back to him his ebbing strength. He glared about him, but it was impossible to ascertain from where the shot had come. He could not even locate the direction within a hundred degrees, for Joe had been in the act of turning. Nobody was in sight, and the woods were silent.

His belting call of fury that went echoing through the trees elicited no answer. He tore strips from his handkerchief, holding it between his teeth, and, with his left hand on his knee, knotted them about a stick and improvised a tourniquet. The blood was spurting down his sleeve in jets, the

Wilton stumbled over the rough ground until he reached the cleared road through the trees. Here the going was easier, but the burden numbed his right hand and shoulder, the throbbing pain in his left seemed to beat time to his footsteps, and the ache of the cramping muscles increased the agony of his wound and began to spread down his body.

A wind sprang up, driving gusts of whirling snow into his eyes. A deadly lethargy was creeping over him, and presently, turning his head to shield his eyes from the beating blasts, he saw a trickle of crimson on the road behind him.

The tourniquet had loosened. He was bleeding his life away. The blood was gushing down his fingers. Wilton set Joe's body down and succeeded in tightening the compress. And it was only after an almost superhuman struggle that he could get Joe over his shoulder. He knew that if he was forced to set the body down again he could never lift it.

With knees bent, tripping over the roots of the trees, and reeling through a swimming world, he staggered on and on and on. And neither his anger nor the thought of Kitty could have kept his resolution through that nightmare of pain. It was all Joe now, the memory of Joe, his love for him, and his resolve that his friend's remains should not be torn by the timber-wolves.

Joe had befriended him years before, when he had drifted, penniless, into Winnipeg. Joe's faith had been his own, and the secret of the Missisquoi theirs.

So the miles reeled off behind him, while the wind increased and the snow fell thicker along the way. At last the trees opened, and the bleak shore of Big Muskeg lay before him, a desert of ice and snow, with the bluffs opposite, and beyond them the trees once more.

At once the fierce swirl of the gale caught him, whistling like sirens, boring into his face like white-hot probes. The ice that fringed his lashes blinded him and pulled them from the lids when he tried to open his eyes. He reeled on, clutching Joe's body, and heard his own voice go from him in shouts of despair. They rolled across the snow, and the echoes came in faint, mimicking answer from the distant cliffs.

Wilton retained sufficient consciousness of his surroundings to make his way along the shore toward the portage. He might have shortened his route to McDonald's store a little by risking a direct crossing; but the surface of a muskeg is always dangerous, even in midwinter, when the apparently solid ice conceals sink-holes of slush, which, mixed with peat and ooze, does not congeal firmly, and entraps the unwary traveler, a quick-mud from which escape is next to impossible.

Wilton retained sufficient consciousness of his surroundings to make his way along the shore toward the portage. He might have shortened his route to McDonald's store a little by risking a direct crossing; but the surface of a muskeg is always dangerous, even in midwinter, when the apparently solid ice conceals sink-holes of slush, which, mixed with peat and ooze, does not congeal firmly, and entraps the unwary traveler, a quick-mud from which escape is next to impossible.

He might have shortened his route to McDonald's store a little by risking a direct crossing; but the surface of a muskeg is always dangerous, even in midwinter, when the apparently solid ice conceals sink-holes of slush, which, mixed with peat and ooze, does not congeal firmly, and entraps the unwary traveler, a quick-mud from which escape is next to impossible.

His impulse was to carry Joe's body back to the camp, but he knew that it would be impossible to make the distance. Yet to leave it would mean the certainty of mutilation by bears or timber-wolves unless he could build a cairn of stones. And of that he was equally incapable. He set Joe's body down, and, in the first full realization of his loss and his predicament, he shouted curses to the sky.

That murder had been intended he did not believe; no doubt the shot had been a bullet fired at some nearer mark, perhaps a hare, and by one of the half-breeds. He suspected that the transit-bearer, following them up, had fired the shot, and, seeing the fatality, had fled.

But the thought that this might be the explanation was only a fleeting one. Joe was dead, and his body must be cared for, just as if he were alive—taken back to the camp and thence out of the woods. There was no possibility of leaving Joe's body there. Yet it seemed to him that he could not hope to reach the camp. And now another idea came to him.

It was seven miles back to the camp, but only five to the portage over the frozen swamp. Upon the other side of the portage was a trail that came out of the prairie southward and wound into the unknown north. Along this Indians brought their winter catches to the trading-store of McDonald, the factor of the Hudson's Bay company.

Traveling was hard along the shore of the great Muskeg, but it would mean two miles less, and it was just possible to make the store. McDonald was a queer, taciturn, sometimes venomous old man, and had evinced a strong dislike of Wilton on the occasion of their last meeting. Yet McDonald would shelter him and receive Joe's body. And then there was Molly, his daughter.

Wilton, having made his choice, acted on it at once. With a great effort he raised Joe's stiffening form upon his shoulder; and, doggedly he began his awful journey, his right arm grasping the dead man, his helpless left hugging the tourniquet-stick against his side.

He stumbled over the rough ground until he reached the cleared road through the trees. Here the going was easier, but the burden numbed his right hand and shoulder, the throbbing pain in his left seemed to beat time to his footsteps, and the ache of the cramping muscles increased the agony of his wound and began to spread down his body.

A wind sprang up, driving gusts of whirling snow into his eyes. A deadly lethargy was creeping over him, and presently, turning his head to shield his eyes from the beating blasts, he saw a trickle of crimson on the road behind him.

The tourniquet had loosened. He was bleeding his life away. The blood was gushing down his fingers. Wilton set Joe's body down and succeeded in tightening the compress. And it was only after an almost superhuman struggle that he could get Joe over his shoulder. He knew that if he was forced to set the body down again he could never lift it.

With knees bent, tripping over the roots of the trees, and reeling through a swimming world, he staggered on and on and on. And neither his anger nor the thought of Kitty could have kept his resolution through that nightmare of pain. It was all Joe now, the memory of Joe, his love for him, and his resolve that his friend's remains should not be torn by the timber-wolves.

Joe had befriended him years before, when he had drifted, penniless, into Winnipeg. Joe's faith had been his own, and the secret of the Missisquoi theirs.

SEVERAL MODERN DELICIOUS AND NUTRITIOUS CORN MEAL RECIPES

Muscle and Patience Are Required to Grind Corn Indian Fashion.

(Prepared by the United States Department of Agriculture.)
When the first explorers came to America they found that ground corn or maize was one of the principal articles of diet with the native tribes. The early settlers quickly recognized its value as a food, and all through American history corn has played its part and has been highly prized by the people.

At present it is not used to the extent that it might be by many people because they usually have only one or two recipes for its use. The following recipes, tested in the kitchen of home economics of the United States Department of Agriculture, are a little different and all are delicious and nutritious:

Corn Muffins With Dates.
1 cupful white corn meal, 1 cupful wheat flour, 2 table spoonfuls brown sugar or sirup, 1 egg, 1 teaspoonful salt, 1 1/4 cupfuls milk, 2 table spoonfuls butter.
4 teaspoonfuls baking powder, 1 egg, 1 cupful wheat flour, 1 cupful milk, 1/2 cupful dates cut into small pieces.

Cook together the first five ingredients for ten minutes in a double boiler. When cool, add the egg, the dates, and the flour sifted with the baking powder. Beat thoroughly and bake in muffin pans in a quick oven, or bake in a loaf. The bread will keep in good condition longer if the dates are cooked with the corn meal and other ingredients in the double boiler.

Variety may be secured by cooking the dates with the other ingredients in the double boiler.

Custard Corn Cake.
2 eggs, 1 cupful milk, 1/2 cupful sugar, 1/2 cupful flour, 1/2 cupful corn meal, 1/2 cupful butter, 1/2 cupful salt, 1/2 cupful soda, 1/2 cupful sweet cream.

Beat the eggs and sugar together thoroughly. Sift the flour, soda and salt together and mix with the meal. Mix all the ingredients but the cream and butter. Melt the butter in a deep

pan, using plenty on the sides. Pour in the batter, add (without stirring) a cupful of cream, and bake 20 to 30 minutes. When cooked there should be a layer of custard on top of the cake or small bits of custard distributed through it.

For economy's sake milk may be used in place of the cream in this recipe.

This serves six people.
Corn Meal and Rice Waffles.
One-half cupful corn meal, One-half cupful melted butter, One-half cupful wheat flour, 1/2 cupful soda, 1 cupful boiled rice, 1 teaspoonful salt, 2 eggs, well beaten, 1 cupful sour milk. Sift together the flour, soda and salt. Add the other ingredients and beat thoroughly.

This serves four to six people.
Cheese Pudding.
1 quart boiling water, One-half pound yellow corn meal, One-half cupful milk, One-half pound cheese.

Into the boiling, salted water pour the corn meal slowly, stirring constantly; place in double boiler and cook for 20 minutes; then add most of the cheese and cook ten minutes more, or until the cheese is melted. Add one-half cupful of milk and cook a few minutes. Pour into a greased baking dish. Brown in the oven. This dish is improved by grating a little hard cheese over the top just before it is baked. This pudding can be cut into slices when cold and fried.

Fruit Gams.
One-half cupful corn meal, 1 cupful salt, 1 cupful wheat flour, 1 cupful raisins, 2 teaspoonfuls baking powder, 2 eggs, 1 table spoonful sugar, 1 table spoonful flour reserved for dusting, 1 table spoonful melted butter, 1 table spoonful currants or raisins.

It will serve four to six people. Mix and sift the dry ingredients; add the milk gradually, the eggs well beaten, melted butter and raisins, which have been floured. Bake in a hot oven in buttered gem pans 25 minutes. This makes 12 cakes.

TAKING BETTER CARE MEANS FEWER GLOVES

One Practical Method Recommended by Specialists.

Moistened With Gasoline—Best Plan to Wash White Silk at Night to Prevent Coloring.

(Prepared by the United States Department of Agriculture.)

Kid gloves may be cleaned at home if one has the time. One method that has seemed practical and is recommended by clothing specialists of the United States Department of Agriculture is to rub the soiled parts of the gloves with cornmeal moistened with enough gasoline to keep the meal from scratching the gloves, then to dry them thoroughly in the air. Another method is to shake them up and down in a fruit jar partly filled with gasoline, changing the gasoline until it remains clear. Gasoline must always be used in the open air, because it is very inflammable and explosive. White kid gloves clean more satisfactorily than colored ones.

Washable kid gloves may be cleaned by putting them on the hands and washing them in lukewarm suds made with neutral white soap, rinsing them thoroughly and drying them slowly. A little talcum rubbed in after the gloves are dry restores the soft finish to many kinds of gloves.

Silk gloves are best washed in cold or lukewarm suds made with good white soap or white soap chips; they should be well rinsed. It is better to wash white silk gloves at night to prevent their turning yellow from the combined effect of light and moisture. Cotton fabric gloves may be washed in lukewarm suds, rinsed, and hung in the air to dry.

When Frying Eggs.
The objectionable sputtering and flying of hot fat when eggs are dropped in may be prevented if a little flour is sifted into the fat just before the eggs are added.

Whitening Bath Tub.
A mixture of borax and salt whitens a bathtub. Acids should be avoided, as they may spoil the glaze of the enamel while removing the stain.

Avoid Finger Burns.
Hang your tongs for handling hot fruit jars in a convenient place and use them to remove baked potatoes from the oven. No more burned fingers. They are fine also to remove hot corn from the water in which it has been boiled.

Mix Mustard With Milk.
Mix your mustard with new milk instead of water. This entirely removes any bitterness and the mustard will keep fresh for a week or more.

CARROTS SEVERAL WAYS

Carrots may be made very interesting if only you know of several ways to serve them. They are wholesome. The only trouble is that day after day, year after year, they become monotonous if served the same way.

Carrot soup is made by mashing soft-boiled carrots through a puree sieve and adding to a good white sauce foundation, seasoning thoroughly and sending to the table hot, with a sprinkling of minced parsley and paprika.

Carrot salad is made by dicing cold boiled carrots and mixing them with green peas, string beans or chopped celery, dressing with mayonnaise, and serving on lettuce leaves.

Onion soup is a savory dish to serve on a cold night. The salad dressing should be added just before serving. A soft-soap eraser will remove mercury from gold jewelry. Browned bread crumbs and cream are delicious for breakfast.

Two or three cloves sprinkled on top of the stove will quickly kill all stove smells. Hot, unsweetened cocoa may be used in place of scalded milk in cup custard.

After blankets are thoroughly dry beat with a carpet beater and they will be fluffy, like new. Black silk may be cleaned by sponging the dirty parts with the water in which potatoes have been boiled.

When mashing potatoes add salt and mash as usual, then add half a cupful of thick sour cream and beat until light. Put leftover yolks of eggs in cup or bowl and cover with cold water until ready for use. Will keep for several days.

Place a lump of sugar on cheese before putting it away in a cheese dish. It will absorb all the moisture and keep the cheese fresh. It is an easy matter often to pick up enough of some figured crepe or chiffon among the remnants to make a pair of sleeves and to serve for facings as well in a summer frock.

Right Not to Be Withheld. What! shall I not everywhere enliven the light of the sun and stars? may I not seek and contemplate every corner of the earth, under canopy of heaven, consoling and lightful truth?—Dante.

CIVIC DUTY OF IMPORTANCE

Writer of Authority Calls Attention to Need of Co-Operation for the General Good.

Are the people in your community, as a general thing, genuinely interested in public affairs? Or are they so absorbed in their own concerns that they give little thought to civic problems and issues? Is their prevailing spirit one of hearty neighborliness? Do they co-operate to maintain a pleasant community life?

Are they free from the mobbishness of wealth? Are they tolerant in regard to religious questions? Do they frown upon petty gossip and all scandal-mongering?

Have they a proper pride in the appearance of their homes and streets, so that the neighborhood maintains an attractive appearance? Or is their attitude in regard to this—as in regard to compliance with public-health regulations—one of indifference?

These are questions of more than academic interest to you. They bear directly on your welfare, and in especial on the future well-being of your children.

It goes without saying that you wish to see those children grow to be efficient and worthy men and women. Do not forget that the kind of community in which they are reared is bound to play a part in determining the kind of men and women they shall be.

Do not think that if the life of your community is an inferior life your children will be unaffected by it. They are certain to absorb something of its spirit to their lasting hurt. Whereas, if it is a superior life the benefit to them will be equally lasting.

Now ask yourself whether, as a member of the community, you are helping to raise or to lower community standards. Put to yourself regarding yourself the same questions I have put to you regarding the community as a whole.—H. Addington Bruce in the Chicago Daily News.

The Flyless City.
The flyless city is the dream of health officials. McPherson, Kan., with a population well under ten thousand, plans to realize the dream next summer by the enforcement of an ordinance enacted by the city commission, which offers an example to every community which makes the well-being and comfort of its citizens one of the foremost considerations.

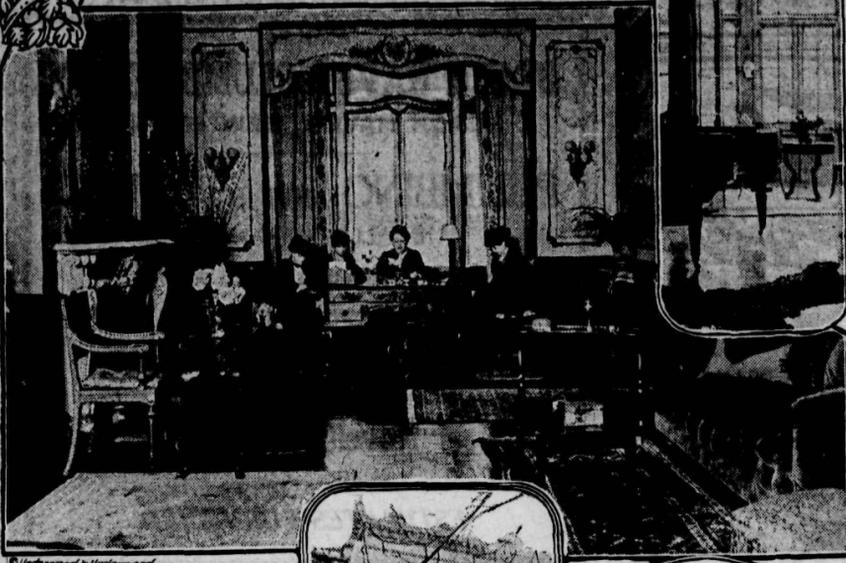

The commission, after studying the problem from all angles, has ruled that no resident of McPherson shall be allowed to keep more than one horse, cow or hog within the corporate limits. All barns, stables, chicken houses and even dog houses must be cleaned three times a week and the refuse removed outside the city, where means will be available for its destruction. Every merchant must place wire flytraps at the front and rear entrances of his place of business and all citizens must take similar precautions in their homes under penalty of incurring a fine.—Providence Journal.

Might Learn From Athenians.
To have a grownup body of citizens in a town it is essential that local loyalty, local interest, local pride, augmented by local service, be inculcated and assigned their tasks.

Why not recall the spirit and mode of ancient Athens in her period of highest civic power and grace? The Athenian youth, on reaching his majority at eighteen years, was entrusted with a citizen's weapons, the shield and spear. He took his citizen oath at a public meeting in the temple of Dionysius, where solemn rites to Zeus and the local divinities were observed in connection with a drama. Among the new Athenian citizen pledges was this: "Not to leave my town in a worse bit than I found it."—Quincy L. Wood, in the Chicago Daily News.

Capital Club House for Club Women

General Federation of Women's Clubs Buys Washington Headquarters

THE General Federation of Women's Clubs—with a membership of over 2,000,000 women in more than 11,000 clubs in every nook and cranny of the United States—has established headquarters worthy of its standing as a national organization. It has purchased a suitable building, has moved in and is "at home." This headquarters is, of course, in the national capital, Washington, in these later days, is the place of places for headquarters of such an association of women. The World War and its aftermath has made Washington not only a national, but a world center. The women of nation-wide organizations have been prompt to see Washington's advantages as an aid to their work. The charm of natural surroundings, the advantage of department and bureau environment, the benefit to be derived from locating at the axis of national activities, the privileges offered for making helpful contacts with other groups of organized women—these and other considerations have led many women's organizations to establish headquarters in the Capital City.

The General Federation holds its conventions, concerts and board meetings in the big cities of the country, chosen according to circumstances. Its first headquarters of sorts was a bureau of information at Portsmouth, N. H. This bureau of information was moved to Washington. There it developed other phases of headquarters activity until it outgrew its rooms in the Maryland building.

The new club house will function as a research and legislative headquarters, as a publishing and distributing center, as a conference and council hall, and as a social residence with possibilities for fostering national and international fellowship.

Explanation of the comparative slowness of the General Federation to establish commensurate headquarters in Washington lies in the work of the federation. For a quarter of a century and more the club movement has sought to create in every community a group of organized women who can be depended upon to promote all movements looking toward the betterment of life. In this quarter of a century of growth clubs have been organized all over America—in city mansions, in farm houses, in school houses at crossroads, in cabins on the mountainside, in pioneer huts of the frontier.

The General Federation of Women's Clubs has aided in the formation of libraries, the establishing of kindergartens, the erection of musical club houses, the fostering of traveling art exhibits, the stimulation of conservation of natural resources, the purchase of play grounds, the maintenance of rooms and wards in hospitals, the encouragement of good roads, the supervision of erection of war memorials, the initiation of the school lunchroom, the adoption of the children's clinic, the promotion of the study of mothercraft. In short, the ideals of the club movement are expressed through departments of fine arts, applied education, public welfare, American citizenship, legislation and press.

Thus throughout its history the Gen-

eral Federation has unselfishly given generous support to all betterment movements, choosing to aid in constructive attainment rather than devote its income to housing its interests. It has thus come about that the General Federation has witnessed city federations and county and state groups well housed before it has taken up consideration of permanent national headquarters.

All through these years there has been unity in diversity—diversity in political convictions, in religious faiths, in racial traditions, but unity in the federation of effort for the well-being of the nation. Of the General Federation, it has been said, "There is no other group of women as large in all the world or so closely bound together." This bond of ever-increasing unity and influence has demonstrated the necessity of establishing permanent headquarters—headquarters which are to be a visible symbol of strength and centralization of purpose, maintaining continuity of effort and organization while administrations come and go.

At the biennial convention of 1920 in Des Moines, Ia., a resolution was adopted to the effect that the General Federation should establish in Washington "headquarters commensurate with the dignity, size and influence of the organization." In 1921 the board appointed as a committee at headquarters Mrs. W. S. Jennings, first vice president; Mrs. J. R. Schermerhorn, second vice president; and Mrs. Robert J. Burdette, director from California, with Mrs. Schermerhorn as chairman.

When Mrs. Thomas G. Winter, president, went to Washington as a member of the armament conference the search for suitable headquarters was prosecuted with renewed energy. It's a fair guess that the General Federation's needs of adequate headquarters was especially in evidence during these days. At a board meeting in Washington a selection was made. The deal was closed up, a first payment turned over and financial arrangements made.

The house built by Gen. Nelson A. Miles at 1734 N street, N. W., is the General Federation's new headquarters. It was built by General Miles, and possesses dignity and charm. It is near the British embassy, the National Geographic society and National Education association. There are excellent office space, assembly rooms of comfortable accommodation and appropriate capacity, library, conservatory, studio, lounge, tea rooms, over a dozen bedrooms, baths, lavatories, a formal garden and two garages with additional quarters.

The photographs reproduced here-with give an idea of the new headquarters, without and within. In the largest picture the women, from left to right, are: Mrs. John Dickinson

Sherman, Estes Park, Colo., chairman of the department of applied education; Miss Lida Hafford, director of headquarters; Mrs. Thomas G. Winter, Minneapolis, president, and Mrs. Horace Mann Towner, Minneapolis, chairman committee on international relations.

The purchase price of the house is \$70,000. Furnishings and a maintenance fund will bring the cost up to about \$150,000. A mortgage for \$50,000, due in three years, will be carried. The clubs in the General Federation are contributing the funds.

The General Federation of Women's Clubs operates under a charter granted by act of congress March 3, 1901. The other day congress passed a bill (H. R. 9,979) amending that act so as to enable the General Federation to swing the deal.

The board of directors appointed a headquarters committee as follows:

Chairman, Mrs. Thomas G. Winter, president; Mrs. W. S. Jennings, first vice president; Mrs. J. R. Schermerhorn, second vice president; Mrs. George Minot Baker, Massachusetts; Mrs. Robert J. Burdette, California; Mrs. Helen Norris Cummings, Virginia; Miss Florence M. Dibert, Pennsylvania; Mrs. Eugene B. Lawson, Oklahoma; Mrs. Wallace T. Perham, Montana; Mrs. Benjamin F. Saunders, Mississippi; Mrs. John W. Watzek, Iowa; Miss M. Lillian Williamson, District of Columbia; director headquarters, Miss Lida Hafford.

International relations, in view of the League of Nations, the armament conference and the Genoa conference, are important matters these days—as well as interesting. And of course international affairs bulk especially large in Washington. So an additional activity of the General Federation is indicated by the creation of a national committee on international relations by the board of directors. Mrs. Charles E. Hughes is the honorary chairman and the chairman is Mrs. Horace M. Towner, wife of Representative Towner of Iowa.

"The most vital thing that women can do now in helping the peace movement is to cement the understanding of women of all countries and to focus their developing power and energies on this fundamental achievement upon which all other activities of civilization must hang," said Mrs. Winter, announcing Mrs. Towner's appointment.

The first activity of the new committee will be the observance May 30 of an International Memorial day. As preliminary to establishing friendly international relationships, greetings have been sent to the women of Canada and the women of Japan. These include an invitation to send delegates to the Biennial Convention of American clubwomen to be held at Chattanooga, N. Y., in June.

"Flappers" Used Snuff

The flapper of 200 years ago had one besetting weakness that is not shared by her modern sister. The use of snuff was one of the pet vices of the young lady of fashion in the Eighteenth century. The practice elicited a roar of protest from a gentleman who wrote a letter on the subject in 1711. He tells of the conduct of a young gentlewoman in church, and declares "she pulls out 'er box

in the middle of the sermon and, to show that she has the audacity of a well-bred woman, she offered it to the men as well as to the women who sit next her. Last Sunday, when they came about for the offering, she gave her charity with a very good air, but at the same time asked the church warden if he would take a pinch."

Art of the Story Writer. Story-writing is always experimental, just as a water color is, and that something which does itself is the

THEY PLAYED WITH DOLLS

Hugh Capet, the first king of France, away back in the year 987, gave a fancy dress ball, at which he presented the women of the court wonderfully made dolls dressed in exact reproduction of costumes worn by the favored ones. From that time until the Italian Renaissance French dolls were the finest in the world, and French men and women played with them almost as much as did their children.—Leslie's Weekly.

Avoid Letters

The editors of a recent volume of literary selections for the use of college students calmly omit Lamb and Hazlitt and proceed to justify the omission by the remarkable assertion that to encourage a pupil "in pleasant rambles with Ella or Hazlitt through the by-ways of literature is to put a weapon into the hands of those critics who condemn the English teacher as a pedant or a dilettante and to

vitality of it. I think we must know what good work is before we can do good work of our own, and so I say, study work that the best Judges have called good and see why it is good; whether it is, in that particular story, the reticence or the bravery of speech, or the absolute clearness and finality of revelation; whether it sets you thinking, or whether it makes you see a landscape with a live human figure living its life in the foreground.—Sarah Orne Jewett.

Better Farm Houses Help.

Better farm homes would be great incentives for better farming and higher standards of living on some farms. Farmers should live comfortably while they live and give their children a chance to enjoy life.

CLOSE CO-OPERATION NECESSARY BETWEEN CANNERS AND GROWERS

(Prepared by the United States Department of Agriculture.)
Growing canning peas is a specialized industry which requires the closest co-operation between the grower and the canner. A new Farmers' Bulletin, No. 1255, "The Production of Peas for Canning," by Chester J. Hunn, assistant horticulturist, has been issued by the United States Department of Agriculture. This bulletin describes the plan followed by canners to provide a supply of peas, and the methods the growers should use in growing, harvesting and handling the crop.
Being legumes, canning peas fit admirably into a general farm rotation in sections where the crop can be grown and have a marked influence in increasing the yield of crops which follow them. Easy accessibility to a cannery which will contract for the entire output is a necessity if the growing of canning peas is to be undertaken on a commercial scale.

Loading Peas to Be Hauled to the Canning Factory.

Peas for canning pass their prime condition within a very few days, and it is necessary to handle the crop promptly.

Refuse is Big Asset.

In dairy and stock-feeding regions the utilization of pea-vine refuse as feed is an important asset. Many canneries winter large herds of stock profitably, using pea-vine refuse for the greater part of the ration. When pea vines are completely rotted they have a fair fertilizing value but the material should not be used on land to be planted in peas. It is considered a better practice to feed the roughage to stock and obtain manure from the animals, thus securing a double return on the vines and labor.

Peas rank third in tonnage among the canned vegetables of this country. The industry, which originated near Baltimore, Md., is now centralized for the most part in the region about the Great Lakes. In 1920 there were 12,313,000 cases of peas canned, which represented 133,272 tons of peas grown on 139,188 acres.

Fertile Soil is Needed.

The pea crop requires a mellow, fertile, well-drained soil. The seed bed should be deeply prepared and left with a smooth surface to facilitate harvesting with a mower. The crop, as usually grown in drills like wheat, requires no cultural attention after the seed is sown. Being essentially a cool-weather crop, it is grown most successfully in those regions where the spring is a little slow in changing from cool to warm weather.

RAPE GOOD SUMMER PASTURE

Takes High Rank as Succulent Feed for Hogs and Sheep—Plant Will Endure Frost.

Among the crops which can be grown for succulent pasture for hogs or sheep during the summer and fall months, rape takes high rank. It furnishes abundant food which is greatly relished by those animals; it is easily grown and can be sown most any time in the spring or early summer after there is no further danger of severe frost. It will endure severe frost in the fall and can be pastured late provided stock is kept off when it is frozen.

PROTEIN FEEDS ARE NEEDED

On Average Farm Such Roughages as Alfalfa Hay, Clover or Pea Hay May Be Fed.

A dairy cow may take on flesh when she receives a carbohydrate ration; but her milk flow will continue to diminish until enough protein feed is included to balance the ration. Protein feeds are essential where dairy cows are fed for profit. On the average farm such roughages as alfalfa hay, clover or pea hay may be fed to form the bulk of the protein ration, while cottonseed meal is satisfactory for supplying protein in concentrated form.

GROWING VERY MILD ONIONS

Liberal Use of Well Rotted Cow Manure as Fertilizer is Favored—Moisture Helps.

It is possible to grow very mild onions by the liberal use of well rotted cow manure as a fertilizer instead of the manure from the horse barn. Apply the manure liberally during the spading process, and plant the onions at least two inches in depth. Too shallow planting will produce stronger onions than deeper planting, no matter what kind of soil is used. Moisture will help also in the production of mild onions.

Better Farm Houses Help.

Better farm homes would be great incentives for better farming and higher standards of living on some farms. Farmers should live comfortably while they live and give their children a chance to enjoy life.

Good Planning.

Planning your work so that it can be done with the least possible effort is not laziness, but good planning.

Stories of GREAT INDIANS

RED CLOUD VICTOR IN AN AMERICAN WAR

THE average school histories assert that America has been victorious in all of her wars. But they are strangely silent about a conflict in which one man defied the power of the United States and dictated his own terms of peace. That man was Red Cloud (Makpica Luta), chief of the Ogallala Sioux.

When government commissioners sought the right to build forts along the Bozeman trail to the Montana gold fields, Red Cloud steadfastly opposed this encroachment on the choicest hunting grounds of the Sioux. In a council of his people he declared: "Dakotas, I am for war!"

Col. H. B. Carrington entered Wyoming, nevertheless, to build the forts and Red Cloud sent him this defiant message: "I shall stand in the trail." A war followed in which the Ogallala under Red Cloud killed 81 soldiers under Colonel Fetterman near Fort Phil Kearney. This loss was avenged the next year when Red Cloud lost half of the 3,000 warriors whom he sent against 32 soldiers in a wagon box corral.

Despite this reverse Red Cloud remained master of the situation. In 1868 he delivered his ultimatum to a peace commission. The forts must be abandoned and all further attempts to open the Montana road must cease. More than that, he fixed the boundaries of the Sioux country to suit himself. The commissioners agreed to every demand, for the Ogallala chief refused even to meet them until the garrisons had actually been withdrawn. His victory was complete.

From the day he signed the treaty he kept his promise to live at peace with whites. "Ninety-one years old, blind, almost deaf, he sits dreaming of the past," writes one who visited him then. "No wonder he is irritated by the idle information seeker. Who would be called back from the dreams of his youth? Slightness and infirm, he is reliving the days of his youth when he sat on his horse as king, the pride of the great Sioux nation."

General Suggestions.

Good drainage is very important. Fall plowing is recommended where it can be practiced without injury to the land, and thorough flogging of the top layer of soil at planting time. Weeds are partly prevented by the early working of the ground, by the heavy cover formed by the pea vines, and also by the early harvesting of the crop. Stable manure, when available, may be applied with advantage. Many growers prefer to apply the manure to the previous crop rather than directly to the peas. Manure mixed with decayed pea vines should not be used as this practice is liable to spread diseases affecting the crop. The growing of peas increases the nitrogen content of the soil. Inoculation of the seed will often give an increase of 100 to 700 pounds of peas per acre.

Seed should be procured from a reliable source.

It should be from the crop of the previous year and not a blending of new and old seeds. The time for planting and harvesting is determined by the locality. Methods of harvesting and practices followed in disposing of the pea vines are discussed in the bulletin, which is available on application to the Department of Agriculture, Washington, D. C.

WHEN TO CUT ALFALFA CROP

Time of Harvesting Always Interesting Subject to Practical Farmer—Some Tests.

The time to harvest alfalfa for hay is always of interest to the practical farmer. In this connection some interesting results have been published. It has been found that two cuttings taken when the alfalfa was in full bloom yielded as large a quantity as three cuttings taken when the plants were at the tenth bloom stage. However, the quality of the hay was superior when the three cuttings were made.

RATS MULTIPLYING RAPIDLY

Pest is One of Most Serious Sources of Loss to the Farmer and Poultryman.

Rats are multiplying in numbers every year in spite of all of our rat-killing campaigns and propaganda. This pest is one of the most serious sources of loss to the farmer and poultryman. Every effort should be made to free the premises of them, and the fact that they seem to hold their own should only be the signal for redoubling our efforts against them.

GROW COWPEAS IN ROTATION

Few Crops Are Equal to It When It Comes to Standing Drouth—Good After Grain.

Cowpeas are excellent crops to follow wheat and oats in a rotation. As soon as the small-grain crop is harvested and removed, a crop of peas may be planted. If the season is suitable a good crop of peas may be expected. Few crops will endure hot weather as peas and very few are equal to it when it comes to standing drouth.

Valuable Plant Overlooked.

One very valuable garden plant often overlooked is tame greens. A few square feet will yield many pots of food rich in iron, and at a time when green food is most welcome. Kale, spinach and turnips are fine for this.

RED CLOUD VICTOR IN AN AMERICAN WAR

THE average school histories assert that America has been victorious in all of her wars. But they are strangely silent about a conflict in which one man defied the power of the United States and dictated his own terms of peace. That man was Red Cloud (Makpica Luta), chief of the Ogallala Sioux.

When government commissioners sought the right to build forts along the Bozeman trail to the Montana gold fields, Red Cloud steadfastly opposed this encroachment on the choicest hunting grounds of the Sioux. In a council of his people he declared: "Dakotas, I am for war!"

Col. H. B. Carrington entered Wyoming, nevertheless, to build the forts and Red Cloud sent him this defiant message: "I shall stand in the trail." A war followed in which the Ogallala under Red Cloud killed 81 soldiers under Colonel Fetterman near Fort Phil Kearney. This loss was avenged the next year when Red Cloud lost half of the 3,000 warriors whom he sent against 32 soldiers in a wagon box corral.

Despite this reverse Red Cloud remained master of the situation. In 1868 he delivered his ultimatum to a peace commission. The forts must be abandoned and all further attempts to open the Montana road must cease. More than that, he fixed the boundaries of the Sioux country to suit himself. The commissioners agreed to every demand, for the Ogallala chief refused even to meet them until the garrisons had actually been withdrawn. His victory was complete.

CHIEF'S NAME WAS OLD-MAN-AFRAID-OF-HIS-HORSES

DURING the Sioux war of 1804-67 the head chief of the Ogallalas was a man known to his people as *Tashunka Kookipapi*. Once a careless interpreter translated this name into English as *Old-Man-Afraid-of-His-Horses*, and this title, with its implication of cowardice, stuck with him through history.

Accustomed as the white man was to curious Indian names, this one was particularly interesting and many attempts were made to explain it. The literal interpretation that he feared his own horses was scarcely complimentary to a war chief of the Ogallala Sioux. Then there was a story that he owned a great many horses which he was constantly afraid of losing and that once when the Shoshones attacked his camp he left his family in the hands of the enemy to run off his horses.

More creditable was the interpretation of his being such a great chieftain that even the sight of his horses inspired fear in the hearts of his enemies. The true interpretation of his name, as given by his son, Young-Man-Afraid-of-His-Horses, was "He Whose Horse They Fear" (literally: "Ta, 'his'; shunka, 'horse'; kookipapi, 'they fear it'). This arose from the fact that he had a vicious pony.

His English name is an example not only of the frequent poor translation of Indian names by the whites but also of the fact that some insignificant incident may be the deciding factor in naming a great Indian warrior. Old-Man-Afraid-of-His-Horses retained his position as head chief of the Ogallala until 1873. At his death in the late '70s the name passed on to his son, Young-Man-Afraid-of-His-Horses, who was prominent during Ghost Dance troubles of 1890-91.

After the troubles were over a Washington newspaper correspondent was sent to interview Young-Man-Afraid. The correspondent took an interpreter with him to the chief's tepee. Young-Man-Afraid asked them to dinner. They ate. Then wanting to do the right thing but not knowing whether it was proper to tip a big Indian chief, the newspaper man dropped three silver dollars into the hands of the chief's wife and had his interpreter say: "In my country a compliment to a man's wife is thought a double compliment."

The interpreter repeated the statement to Young-Man-Afraid who grunted, rose, left the tepee and came back with four more wives!

What Constitutes Real Wealth.

Real wealth does not consist in the material things of life—gold, and silver and jewels—but in the intangible possessions on which there is no income tax to pay. A clean conscience, hosts of friends, love of wife and child, appreciation of nature's beauty, sense of the sublimity of art, clear faith in the progress of humanity—these are the things that constitute real wealth. They cannot be counted up in dollars, they exclude the tax assessor; but they are real nevertheless, and priceless.

She is Considered Talkative. A Northeastern matron is considered talkative. Her chatter usually is bright and entertaining and her good friends only laugh at her loquaciousness. Others, not such good friends, sometimes complain they can't "get a word in edgewise," when she is the company. Two friends called Sunday. They were met at the door by Eimer, nine years old. He admitted them, then went to the stairs and called: "Mother, come down. There's someone here wants to hear you talk."—Kansas City Star.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.
It is a physician's prescription. Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.
Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.
Be sure to get Swamp-Root and start treatment at once.
However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Tough. Two negroes were lying behind a packing case on the docks at Brest taking the labor out of the alleged labor battalion. Said one boastfully: "Boy, Ah comes 'um a tough breed. My ole man done cut his nails with a ax an' 'brash his teef wit a file."
"Huh, ain't so tough. Mah ole man am a plumber, an' twice a week he done shave hisself wit a blow torch."—American Legion Weekly.

Having a Heart. "Ought we not to treat the flapper humorously?"
"I don't know," replied Miss Cayenne. "There are circumstances under which it seems cruel to laugh."

Cuticura Soothes Baby Rashes. That itch and burn, by hot baths of Cuticura Soap followed by gentle anointments of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each.—Advertisement.

Attending Her. Wilson—"Does your wife drive your car?" Trimm—"Only when I'm at the wheel."—Answers.

Some men give most of their attention to things that never happen.
Pay day comes pretty often for the man who works for the devil.

As the Editor Sees It

New Citizens
Throughout this month high schools everywhere will be graduating girls and boys—turning out future citizens.

We sometimes feel that nothing so inspires one with the wish that everything in the world might be good, that success might be universal, that the road to honor and respect might be straight and smooth, as to see these girls and boys at the threshold of their careers.

But there is one little thing we'd like to call to the attention of every boy and girl starting into life, those who are just leaving school. And that is the value of remembering that there isn't any more to be taken out of the world than you put in it.

ALIEN BOOTLEGGERS SHOULD BE DEPORTED

The House at Washington has declared by a large majority for the proposal that alien bootleggers shall be deported to their own countries. And why not?

Opponents of the measure say that such legislation will make it difficult to convict violators of the laws. It may be that in some cases juries would hesitate to send such offenders back to their native lands.

The real motive back of opposition to the measure is, doubtless, resistance to any legislative repressive of bootlegging, or calculated to make the prohibitive laws more effective.

It is difficult to work up any real indignation over the hard fate of an alien who peddles moonshine or dope, and, being caught at his nefarious trade, is sent back to his own country. Surely, we don't want him here.

Still another thing that indicates a return to the good old days is that wrist watches are becoming fewer.

It might also be a good idea to remind mothers that if more of them were strappers there'd be fewer "flappers."

It has been our observation that the average poor man's wife is just one darned installment after another.

One objection some fellows seem to have to working is that there are too many other things to do.

We overheard a woman say a few days ago that the men who would make perfect husbands always remain single.

They've got daylight saving in Washington now, and congress can start loafing an hour earlier.

Along about this time of the year the Tuckerton citizens who own lawn mowers starts in trying to remember which one of his neighbors borrowed it last.

AN ORDINANCE

AN ORDINANCE AUTHORIZING AND PROVIDING FOR THE CONSTRUCTION, INSTALLATION AND ERECTION OF AN ELECTRIC LIGHT AND POWER SYSTEM, INCLUDING A GENERATING PLANT, DISTRIBUTING SYSTEM AND ALL NECESSARY APPURTENANCES, AND THE ACQUISITION OF SUCH LANDS THEREFOR AS MAY BE NECESSARY, THE PURCHASE OF ALL NECESSARY MACHINERY, MATERIALS AND APPARATUS THEREFOR AND THE ISSUANCE BY THE BOROUGH OF BEACH HAVEN OF BONDS IN THE AMOUNT OF \$2,000 TO PROVIDE FUNDS FOR THE PAYMENT OF THE COST THEREOF.

WHEREAS, Heretofore an ordinance of the Borough of Beach Haven was duly passed and approved, authorizing the construction and installation by said Borough at public expense of an electric light and power system for said Borough, including a generating plant, apparatus, poles, wires, distributing system and all necessary equipment, appurtenances, etc.; and WHEREAS, in aid of said ordinance the sum of \$2,000 was appropriated and directed to be applied on account of the payment of the costs and expenses of providing, installing and constructing said electric light and power system; and WHEREAS, the necessary equipment, machinery and apparatus therefor, including a generating plant, distributing system and all apparatus; said sum, or so much thereof as might be necessary, has not been paid; and WHEREAS, the purchase of the principal of said bonds and the interest to accrue thereon, as hereinafter provided, and that all real estate and property within said Borough of Beach Haven shall be liable for the payment of the principal and interest that may become due on said bonds.

SECTION 1. That it is hereby determined that for the purpose of providing, installing and constructing said electric light and power system and the purchase of the necessary land, equipment, machinery and apparatus therefor, and to provide funds for the payment of the costs of the same, including engineering, legal, incidental and all other expenses in connection therewith, and under and pursuant to the authority and power granted and conferred by the terms and provisions of an act of the Legislature of the State of New Jersey, entitled "An Act to authorize and regulate the issuance of bonds by municipalities and the incurring of their obligations and the incurring of their liabilities by county, city, borough, village, town, township or municipal corporation, approved March 22, 1916, as amended by Chapter 242, P. L. 1917, and the various acts supplemental thereto and amendatory thereof, and under and by virtue of the authority of the same, bonds of the Borough of Beach Haven, in the amount of \$2,000.00, which shall be necessary to be raised for and shall be applied to the purposes aforesaid, are hereby authorized to be issued.

SECTION 2. Said bonds shall be denominated on their face "BOROUGH OF BEACH HAVEN ELECTRIC BONDS"; shall be dated the first day of July, A. D. 1922; shall be coupon bonds, with the privilege of registry as to principal only; shall be in the order of their serial numbers; shall be numbered from one to forty-two both inclusive, and shall mature and be redeemable and payable as follows:—

Bonds Nos. 1 and 2 shall mature and be redeemable and payable on the first day of July, A. D. 1924; and thereafter every year, and every succeeding year, until bonds to the amount of \$300.00, shall have matured and shall have been redeemed and paid, and thereafter three of such bonds shall mature and be redeemable and payable on the first day of May of each and every succeeding year until all of said bonds shall have matured and shall have been redeemed and paid; namely, No. 42 shall mature and be redeemable and payable on the first day of July, A. D. 1942. Said bonds shall bear interest, payable half-yearly, on each first day of January and July succeeding the day of issue, and until they shall respectively mature and be redeemed and paid, both principal and interest of said bonds shall be payable at the office of Beach Haven National Bank, Beach Haven, New Jersey. Each of said bonds shall recite that it is issued pursuant to the authority of said act of the Legislature and of this Ordinance, and to each of said bonds shall be attached a sufficient number of interest coupons for the payment of \$30.00, numbered consecutively in the order in which they shall severally mature, for the payment of the interest to accrue on the respective bonds to the date of the maturity thereof. Each of said coupons shall bear the number of the bond to which it is attached, together with the facsimile signature of the Treasurer of the Borough of Beach Haven, and shall be valid and necessary to conform to the provisions hereinafter made, each of said bonds and the interest coupons attached thereto shall be substantially in the following form and tenor, to-wit:—

UNITED STATES OF AMERICA
STATE OF NEW JERSEY
BOROUGH OF BEACH HAVEN, IN THE COUNTY OF OCEAN
BOROUGH OF BEACH HAVEN ELECTRIC BONDS
No. 42 KNOW ALL MEN BY THESE PRESENTS, that the Borough of Beach Haven, in the County of Ocean and State of New Jersey, hereby acknowledges its indebtedness to bearer, or, if this bond be registered, then to the registered holder thereof, on the first day of July, A. D. 1922, at the office of BEACH HAVEN NATIONAL BANK, BEACH HAVEN, NEW JERSEY, the sum of ONE THOUSAND DOLLARS (\$1,000.00) lawful money of the United States, and to pay interest thereon at the rate of six per cent. per annum, at said office, in lawful money of the United States, semi-annually, on the first days of January and July succeeding the date of the annexed interest coupons therefor, as they severally mature.

This bond, except when registered, shall pass by delivery and shall be registered as to principal only, in books to be kept for that purpose by the Treasurer of the Borough of Beach Haven, at his office, on the written request of the holder, and if so registered, shall thereafter be transferable only upon said books at said office by the registered holder in person or by attorney, and the last preceding transfer shall have been to bearer, and shall continue to be transferable to such registration and transfer to bearer at the option of the holder, but such registration shall not affect the negotiability of the annexed interest coupons, which shall continue to be payable to bearer and transferable by delivery, and payment whereof shall fully discharge the said Borough of Beach Haven in the County of Ocean, and with respect to the interest therein mentioned, whether or not this bond be so registered.

This bond is one of a series of forty-two bonds of like date and tenor, amounting in the aggregate to the sum of \$2,000.00, numbered consecutively from one to forty-two, both inclusive, maturing in from one to twenty years, as follows:—

Bonds Nos. 1 and 2 shall mature and be redeemable and payable on the first day of July, A. D. 1924; and thereafter every year, and every succeeding year, until all of said bonds shall have matured and shall have been redeemed and paid; the last bond, namely, No. 42, maturing on the first day of July, A. D. 1942, issued under and in conformity with an act of the Legislature of the State of New Jersey, entitled "An Act to authorize and regulate the issuance of bonds and other obligations and the incurring of their liabilities by county, city, borough, village, town, township or any municipality governed by an improvement commission" approved March 22, 1916, and the various acts supplemental thereto and amendatory thereof, and all other enabling acts of the said Legislature, and by virtue of an ordinance of the Mayor and Council of the Borough of Beach Haven, duly passed for that purpose at a meeting duly called and held on the day of February, A. D. 1922, and the faith and credit of the Borough of Beach Haven, in the County of Ocean, are hereby pledged for the punctual payment of the principal of this bond and the interest to accrue thereon, according to its tenor and effect.

It is hereby certified that all conditions, acts and things essential to the validity of this bond issue have happened and have been duly complied with, and that the issue of bonds, of which this is one, is within every letter and intent of the requirement of law affecting the same, and that the issue of bonds, of which this is one, is within every letter and intent of the requirement of law affecting the same, and that the issue of bonds, of which this is one, is within every letter and intent of the requirement of law affecting the same.

Methodical lived to be 900 years old—but he never had to spend half his time dodging autos.
We have always noticed that the man who was driven to drink was going that way anyhow.
It's pretty hard to make the average editor believe that even in heaven a paper can print the truth without fear of losing a few subscribers.

COUPON

THE BOROUGH OF BEACH HAVEN will pay to bearer, THIRTY DOLLARS, lawful money of the United States, on the first day of July, A. D. 1922, at the office of Beach Haven National Bank, Beach Haven, New Jersey, being the semi-annual interest then due on Borough of Beach Haven Electric Bond No.

SECTION 5. BE IT FURTHER ORDAINED that the faith and credit of the Borough of Beach Haven by and through the Mayor and Clerk of said Borough are hereby pledged for the punctual payment of the principal of said bonds and the interest to accrue thereon, as hereinafter provided, and that all real estate and property within said Borough of Beach Haven shall be liable for the payment of the principal and interest that may become due on said bonds.

SECTION 6. BE IT FURTHER ORDAINED that the Mayor and Clerk of said Borough be and they are hereby authorized and directed to execute the bonds above described in accordance with the provisions of this ordinance, as and when they shall be prepared and presented to them for execution.

SECTION 7. BE IT FURTHER ORDAINED that the following matters are hereby determined and declared:—

(a) That the probable period of usefulness of the property, including improvements, of the Borough of Beach Haven, computed according to the requirements of Chapter 252, P. L. 1916, as amended, is \$60,317.00.

(b) The net debt of the Borough of Beach Haven, computed in the manner prescribed by Chapter 252, P. L. 1916, as amended, is \$60,250.51.

(c) The statement required by Section 12, Chapter 252, P. L. 1916, as amended, has been made and said bonds required by law.

SECTION 8. BE IT FURTHER ORDAINED that the bonds, or so many of them as may be necessary to raise the said sum of \$2,000.00, when they shall have been executed as hereinafter provided, be sold at public sale upon sealed proposals after the publication of notice of such sale as required by law, for the best price that can be obtained therefor, but for not less than par value, and the proceeds thereof applied to the payment of the costs and expenses of providing, installing and constructing an electric light and power system for the Borough of Beach Haven and for the purchase of the necessary land, equipment, machinery and apparatus therefor, including a generating plant, distributing system and all appurtenances and to the payment of all interest and costs incidental thereto, and to this issue of bonds.

NOTICE IS HEREBY GIVEN that it is the intention of the Township Committee of the Township of Little Egg Harbor, in the County of Ocean, under and by virtue of the provisions of Section 1, subdivision B, of Article XXII of an act of the Legislature of the State of New Jersey, entitled "An Act concerning municipalities," approved March 27, 1917, and the acts amendatory and supplementary thereto, to vacate Harrison Street, 234th Street, Roosevelt Street and that portion of First Avenue, Second Avenue, Third Avenue and Fourth Avenue, lying between the State and County Road and the Tuckerton Railroad, all as shown on a map entitled "Map of Beach Haven Park in Little Egg Harbor Township, Ocean Co., N. J.," filed in the Ocean County Clerk's Office on the sixth day of September, 1921; and that at a public hearing of said Township Committee to be held at Charles Powell's residence in the Township of Little Egg Harbor, in said Township, on the 3rd day of June, 1922, at 2 o'clock in the afternoon, an ordinance, entitled, "An Ordinance vacating Harrison Street, 234th Street, Roosevelt Street and that portion of First Avenue, Second Avenue, Third Avenue and Fourth Avenue, lying between the Tuckerton Railroad and the State and County Road, all as shown on a map entitled 'Map of Beach Haven Park, Little Egg Harbor Township, Ocean Co., N. J.,' filed in the Ocean County Clerk's Office on the sixth day of September, 1921," will be taken up for consideration; and that at such time and place, or at any other time or place to which said meeting may be adjourned, all persons whose lands may be affected or who may be interested therein will be given an opportunity to be heard concerning the same.

By order of the Township Committee of the Township of Little Egg Harbor, in the County of Ocean, HENRY C. GIFFORD, Chairman.

ATTEST: ALVIN C. COBB, Township Clerk. Dated May 25th, A. D. 1922.

NOTICE OF PUBLIC HEARING

Public Notice is hereby given that it is the intention of the Township Committee of the Township of Little Egg Harbor, in the County of Ocean, under and by virtue of the provisions of Section 1, subdivision B, of Article XXII of an act of the Legislature of the State of New Jersey, entitled "An Act concerning municipalities," approved March 27, 1917, and the acts amendatory and supplementary thereto, to vacate Harrison Street, 234th Street, Roosevelt Street and that portion of First Avenue, Second Avenue, Third Avenue and Fourth Avenue, lying between the Tuckerton Railroad and the State and County Road, all as shown on a map entitled "Map of Beach Haven Park in Little Egg Harbor Township, Ocean Co., N. J.," filed in the Ocean County Clerk's Office on the sixth day of September, 1921; and that at a public hearing of said Township Committee to be held at Charles Powell's residence in the Township of Little Egg Harbor, in said Township, on the 3rd day of June, 1922, at 2 o'clock in the afternoon, an ordinance, entitled, "An Ordinance vacating Harrison Street, 234th Street, Roosevelt Street and that portion of First Avenue, Second Avenue, Third Avenue and Fourth Avenue, lying between the Tuckerton Railroad and the State and County Road, all as shown on a map entitled 'Map of Beach Haven Park, Little Egg Harbor Township, Ocean Co., N. J.,' filed in the Ocean County Clerk's Office on the sixth day of September, 1921," will be taken up for consideration; and that at such time and place, or at any other time or place to which said meeting may be adjourned, all persons whose lands may be affected or who may be interested therein will be given an opportunity to be heard concerning the same.

By order of the Township Committee of the Township of Little Egg Harbor, in the County of Ocean, HENRY C. GIFFORD, Chairman.

ATTEST: ALVIN C. COBB, Township Clerk. Dated May 6, 1922.

GARBAGE REMOVAL

Notice is hereby given that sealed proposals (or bids) for collecting garbage from all premises within the Borough of Beach Haven; removal and disposal of same for a period beginning on or about June 12, 1922, and ending on or about September 23rd, 1922, will be received by the Mayor and Council of said Borough at a meeting thereof to be held on Monday, June 5th, 1922 at 8 P. M. in Council Chambers at the Fire House on Bay Avenue. Bidders are privileged to bid separately for collection of garbage from the premises; also for removal of garbage from the borough by boat or automobile truck or otherwise; and also privileged to bid for collection and removal. Garbage to be removed every day, Sunday included.

A certified check drawn to the order of the Borough of Beach Haven or to the order of A. P. King, Borough Clerk, for the amount of One Hundred Dollars (\$100.00) or cash in equal amount must accompany each proposal or bid. Checks or cash of all unsuccessful bidders will be immediately returned. The check or cash of the successful bidder will be returned upon signing the contract. The right is reserved to reject any or all bids if it is deemed necessary in the best interests of the Borough.

Dated April 20th, 1922. JOHN F. WALSH, Chairman of committee on Sewers & Garbage. HERBERT WILKS, Mayor.

RUNYON MAKES FORMAL BID FOR GOVERNORSHIP

Union County Senator, in Announcing Candidacy, Calls for Less Legislation and More Administration.

AID FOR FARM MARKETS

Advocates Direct Primary; Improved Regulation of Utilities; Equal Educational Opportunities and Limitation of Night Work for Women; Increased Workingmen's Compensation; Hastening of Bridge, Tunnel and Highway Projects.

Trenton, N. J., May 31.—William N. Runyon, state senator from Union county for the past five years, in a preliminary statement of the principles for which he stands, today made formal announcement of his candidacy for the Republican nomination for governor.

WILLIAM N. RUNYON

ent Amendment; less legislation and more administration in state affairs, and revision and codification of the laws; better defined regulation of public utilities, leading to the reduction of gas and electric rates and trolley fares; the limitation of night work for women, and an equal educational opportunity for every child; increase in compensation under the workingmen's compensation act; utmost economy in public affairs to keep down taxes; the immediate development of proposed bridges, tunnels, waterways and roads of the state and the extension of the Bureau of Farm Markets.

At the same time that the announcement was given to the public Mr. Runyon stated that Arthur T. Vanderbilt of Newark would be his campaign manager. Mr. Vanderbilt is county counsel of Essex county and was very active in Mr. Runyon's primary fight for the nomination three years ago.

Senator Runyon's formal announcement follows: "In presenting my name to the voters of the state of New Jersey as a candidate for the Republican nomination for governor I do so with full appreciation of the duties of the great office.

"From my eight years' experience as assemblyman, senator and acting governor, I realize the tremendous responsibility resting on anyone who occupies the position of governor. I would not have the courage to ask the people of this great commonwealth for their support if I did not believe, from many years of close contact with them throughout the state, that I knew, in some measure at least, their hopes and aims and aspirations.

"In announcing my candidacy I desire to make known my stand and my belief on some of the important issues which confront us. From time to time during the campaign I shall take occasion to address the voters on the many problems which demand consideration.

"Believing in the American system of party government and that the direct primary is the only agency through which party organizations may be made responsive to the wishes of the people, I strongly advocate the upholding and continuance of the present direct primary law for that purpose.

"Respect for law is the keystone of all free government. It is the duty of the chief executive of the state to see to it that the law of the state is enforced. It is his duty to see to it that the laws designed to enforce the Eighteenth amendment should be impartially enforced in the same manner as every other law enacted by the legislature.

"We should have less legislation and more administration. The methods which have long prevailed tend inevitably to the enactment of much ill-considered legislation, not only with respect to the policies involved therein, but also with respect to the form in which these policies are expressed. It is intolerable that the statutory law of this state should be spread over

some 15,000 pages. Not only should the legislature have the advice and cooperation of expert draftsmen in the preparation of every act, but each bill introduced should be carefully scrutinized to see whether the welfare of the state demands its passage.

"The people of the entire state are intensely interested in the trolley lines and the gas, electric and telephone companies, both as users and as investors. I do not believe a public service company should have the right first to try its case before the State Public Utilities Commission and then to seek to try its case anew before the Federal courts on entirely different issues. I therefore strongly favor the passage of some act similar to the Bacharach bill, designed to limit the present authority of the Federal courts in this matter. The problem is a state problem for the determination of the Public Utilities Commission and the state courts on principles laid down in the Public Utilities act and in decisions of the Federal Supreme Court. I believe that the values on which rates are based should be actual values, excluding good-will, franchise value, past deficits, development cost, hypothetical brokerage fees, deferred maintenance, Federal taxes and other similar items. This basis of values has been approved by the recent unanimous opinion of the United States Supreme Court in the Galveston Electric Company case. The Public Utilities act should state explicitly what items the commissioners shall take into consideration and what items they cannot take into consideration in valuing the property of the public service companies. The jurisdiction of the commission must be extended to cover not only all holding companies, but also all companies which deal with public service companies to the extent of their dealings with such companies. If any of the public service companies are over-capitalized on the basis of their valuation as found by the commissioners, their capital should be reduced to conform to such valuation. The valuations so found should be the basis not only for rate making, but also for taxing purposes. I am advised by experts that the policy I have outlined will result in substantial reductions in the gas and electric rates, now prevailing in the state, and in all probability in a reduction in trolley fares.

"I desire to express my sympathy with the aims and aspirations of the women of the state, many of whom are actively enrolled among the supporters of the Republican party. I favor the adoption of an act limiting night work for women in laundries, bakeries and factories (excluding canneries) between the hours of 10 p. m. and 6 a. m. There should be an equal educational opportunity for every child. By that I mean that every child in the rural districts should have the same educational opportunities that every child in the city has, and that every child who desires to prepare himself for a trade should have an opportunity for vocational training equivalent to the training given the child who is preparing for business or a higher education.

"The workmen's compensation act should be amended to provide higher rates of compensation more in conformity with actual economic conditions now prevailing.

"There is no panacea to check the rising tide of taxation, save the utmost economy in public administration, the abolition of useless offices and the consolidation of public enterprises wherever possible.

"A state-wide extension of the work of the Bureau of Farm Markets will result not only in a lowering of the cost of living in cities, but in increased profit for the farmers. I stand for better marketing facilities and for increased state interest in farm demonstration and home economics.

"The geographical location of New Jersey renders imperative the immediate development and completion of the proposed bridges, tunnels, waterways and roads of the state. It is equally important that their construction be under contracts arrived at by fair, open competition, free from the influence of any favorite contractors and supervised by competent commissions composed of the public-spirited citizens of the state."

William N. Runyon is a descendant of one of the oldest New Jersey families. He was born in Plainfield on March 5, 1871, and educated at the Plainfield schools and later at Yale University, from which he graduated in 1892. He took up the study of law at the New York Law School. He was admitted to the bar in New York state in 1894 and in New Jersey in 1898, becoming a counselor in 1891.

Always interested in public affairs, Mr. Runyon took an active part in the local government of his home city, serving as a member of the city council and as city judge, holding the latter position for twelve years.

Retiring from the judgeship in 1910, Mr. Runyon remained out of public life until 1914, when he was persuaded to run for the House of Assembly. In his first year he was made Republican leader of the house, and his record resulted in his being re-elected with ease in 1915 and 1916.

In the fall of 1917 the Republicans of the county turned to him for their candidate for state senator, and he is now serving his second three-year term in that office. After his first year in the senate, by virtue of being president, he became acting governor when Walter E. Edge was sworn in as United States senator, occupying that high office for nearly a year.

Senator Runyon has always been to the fore in every fight for good government in the state, and during his legislative career has always refused to be influenced to favor anything which might be construed as breaking down honest and progressive government or the use of legislation to bring about purely partisan advantage.

SATURDAY NIGHT SCHEDULE Effective June 1st, 1921 Auto Stage will run Saturday evenings until further notice as follows: Leave Tuckerton 6.30 P. M. Leave Atlantic City 11.30 P. M. (Virginia Avenue Garage)

Waiting room in the store of my GARAGE on Main street, opposite The Tuckerton Bank. Autos to hire for all occasions at special prices. A full line of accessories. Ford parts, oils, greases, tires and hardware at rock bottom prices. PHONE 26 WALTER ATKINSON, Proprietor.

LOCAL NEWS

Mrs. William Isaacs of Camden, spent several days the past week at the former's home here. Mrs. Isaacs was Miss Bella Hayes prior to her marriage.

Memorial services at the M. E. Church Sunday evening were very well attended and the services enjoyed. Six members of the G. A. R. were present and a delegation from the Junior Order of American Mechanics attended in a body.

Anyone finding a pocketbook containing one dollar might be anxious to know that it was the property of Miss Dorothy Allen and the money she had obtained by selling tickets for the patriotic entertainment given by the Sunshine Society last Monday. The pocketbook was lost on Saturday. Finder will please return to Miss Allen or the Beacon Office.

Charles H. Stiles and mother, Mrs. Isaac Stiles of Trenton, are spending a week in Tuckerton with relatives. Mr. Stiles has been employed for the past six years by the Golding Sons Company at Trenton.

Joseph Rooney, wife and daughter, of Trenton, visited Mrs. Mary Mott over the week end.

George E. Mott was home over the week end.

Miss Alice Brettell of Fieldsboro, N. J., visited her aunt, Mrs. Mary Mott.

Mr. and Mrs. Charles Williams and son Gilbert of Bridgeport, Connecticut, have been visiting Mr. and Mrs. Chas. Cox. Mr. J. Eagle and Miss Grace Beers of Bridgeport, have also been visitors with Mr. and Mrs. Chas. Cox.

Howard White of Jersey City and Frank White of Mount Holly, were visitors with their parents, Mr. and Mrs. Frank M. White, the past week.

Earl Sapp of Baltimore, was among our visitors the past week.

Mrs. Mellie Rose of Atlantic City, Mr. and Mrs. James O. Horner, Mr. and Mrs. Charles Horner, Mr. and Mrs. Willard Horner of Brooklawn, spent a part of the week with relatives in Tuckerton.

The Misses Clark of Bordentown, spent Memorial Day with Mr. and Mrs. Walter Vetter.

Mrs. Frank Stiles of Philadelphia, is visiting Mrs. James Stiles.

Mr. and Mrs. William Morris of Washington, D. C., were here on a visit this week.

Clarence Ireland of Trenton, spent Memorial Day in Tuckerton.

Capt. Thomas A. Mathis of Toms River, enjoyed the Ball Games here on Memorial Day.

Dr. and Mrs. C. H. Conover of Pleasantville, took dinner at the Town Hall and afterward attended the ball games. It's funny how ball games attract some folks. Dr. seldom missed a game when he lived in Tuckerton and was one of our best workers to boost the home team on every occasion. It seemed like old times to see them back, along with so many others of the stand-patters.

Leonard Brown of Philadelphia, spent Memorial Day with his father, James D. Brown.

Miss Marjorie Brown of Philadelphia was a visitor with her aunt, Mrs. R. E. Predmore on Memorial Day.

Mrs. Elizabeth Irons of Philadelphia, was a visitor in Tuckerton the past week.

William Bennett of New Brunswick, was a visitor with his brother, Josiah N. Bennett the past week.

Mr. and Mrs. Fred MacBride of Atlantic City spent the holiday in Tuckerton with the former's parents, Mr. and Mrs. Joel Mott.

Mrs. Eva Gifford, and Russel Mathis of Bay Head; Mrs. Jennie Sharp of children of Margate City; Mrs. Floyd Mathis, Mrs. Harry Peterson and son, Robert, of Atlantic City, visited Mr. and Mrs. Edward Falkenburg on Tuesday. (Continued on last page)

The Dissolution of J. and M.

By JANE OSBORN

There were four of them, Jean and Jane, Maud and Matilda, and they all lived together in a little white house in Hilton and taught school in the Hilton public schools.

"There's nothing to it," said Jean one evening after the supper dishes were out of the way and the four had gathered round the lamp that stood on the center table of their living room.

"Nothing to what?" said Jane, looking up from the algebra papers she was correcting.

"Nothing to school teaching," Jean explained. "You work like a horse all day with such big classes that about all you can do is to keep order and drive in enough facts to get the bright children to pass at examination. You come home tired."

"And what do you get?" Maud took up the refrain.

"A bare existence," sighed Matilda. "And you never meet any one," Jean resumed. "Look at a stenographer. Doesn't have to know half as much as a teacher and she meets men. She gets married or else she starts in business by herself and makes good money."

"I don't care about getting married," said Matilda. "But—" she hesitated and took a chocolate from the box of bonbons open on the table.

"Let's start in business, the four of us." It was Jane who made the proposition.

Then and there it was agreed that they should go into business with a capital B. In a few more months the school term would be over. They could start the day after school closed, see how they made out, and if prospects were good they would all hand in their resignations by August. That would give the school board time enough to get other teachers.

"Let's make candy," said Jane, who had followed Matilda's example and was nibbling a chocolate cream. "Sugar is six cents a pound at retail. Chocolate is fifteen, and candy, that is mostly sugar and chocolate, sells for eighty cents a pound."

So it was agreed that they should start a candy business. Also it was agreed that they should operate under the name of the J. & M. company. Then some one suggested that they must have capital. They must have a shop in a prominent place to sell their wares. They must start from the first with good equipment. They would need at least two thousand dollars, and their combined savings made only one thousand. Some one must get the necessary funds, and it was easy for Jane to persuade the others that Arthur Hayden, confirmed old bachelor and shrewd business man, should be approached. He was the town's richest man. He was most active in enforcing the latest amendment in Hilton. The fact that prohibition had created a keen demand for candy ought to be a good argument with him.

Lots were drawn, and before the school teachers retired that night it had been settled that Maud should undertake this quest of capital. The fates had decided wisely. Maud was aggressive and unafraid. She taught 8-B boys because she had a firm command of herself at all times. Her eye was dark and steady and elyness had been left out of her makeup.

So Maud went to see Arthur Hayden. Arthur Hayden did not want to see her. He avoided her, but she was insistent. He was not especially attracted by her brisk manner and did not feel that the town of Hilton needed another candy store. Moreover, his own business, though in a prosperous condition, was in need of every bit of capital he could command. But Maud came home with her pledge of a thousand dollars.

The next day she called again on Mr. Hayden and that night announced herself as out of the compact.

"Mr. Hayden has offered me a salary that amounts to twice what I am making now. He wants me to begin as soon as school is over. My first work will be to sell stock for Hayden and company."

The fact was that Mr. Hayden had been very favorably impressed with the selling ability of the young woman who had actually been able to convince him to subscribe a thousand dollars to a business enterprise in spite of himself. Mr. Hayden called several times on the teachers, and ten one day he came with good news for Jane. He was president of the local board of education. They were in need of a superintendent of elementary schools and Mr. Hayden, having looked up Jane's record as a teacher, had decided and convinced the board that she was the best candidate for that position. This meant double Jane's present salary, it meant an opportunity to use talent which she knew she possessed. So Jean and Matilda were sole survivors of the J. and M. company.

World's Climate Changeless.

The first striking fact in the geological history of climate is that the present climate of the world has been maintained since the date of the earliest, unaltered sedimentary deposits. The oldest sandstones of the Scotch highlands and the English longmyndes show that in pre-Cambrian times the winds had the same strength, the rain-drops were of the same size, and they fell with the same force as at the present day. The mean climate of the world has been fairly constant, though there have been local variations which have led to the development of glaciers in regions now ice free, at various points in the geological scale. That there has been no progressive chilling of the earth since the date of the oldest known sedimentary rocks is shown by their lithological characters, and by the recurrence of glacial deposits, some of which were laid down at low levels at intervals throughout geological time, according to the United States geological survey.

The Diving Bell.

The diving bell was not mentioned before the sixteenth century. Two Greeks, in 1538, gave an exhibition before Charles V, descending into water of considerable depth in an inverted kettle.

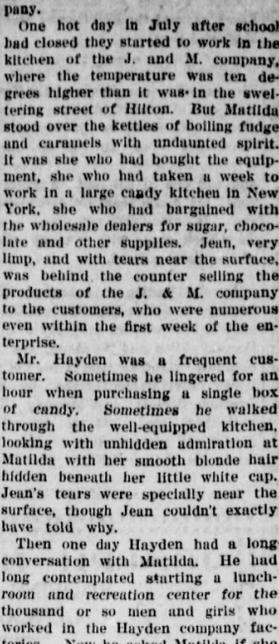

Was Famed as Great American

John Winthrop figures in history as the "Father of Massachusetts"—Leader in All Things.

John Winthrop, rightly called the Father of Massachusetts, for 19 years the guiding spirit of the colony, and for 12 of those 19 years its governor, died at his home in Boston, March 23, 1649.

The passing of Winthrop marked the end of a distinct era in the history of the Massachusetts Bay colony. The era of Winthrop was an era of progress, of construction; an era of Puritanical intolerance held constantly in check by the moderation and kindly spirit of the chief magistrate himself. It is told that when Winthrop was on his death bed he was visited by Thomas Dudley, then deputy governor, and pressed to sign an order of banishment against a person holding false religious opinions. "No," said Winthrop, putting the paper aside. "I have done too much of that work already."

Philly's First City Hall Restored

Philadelphia's first city hall, at Fifth and Chestnut streets, has been carefully restored and was dedicated with impressive ceremonies on May 2. The beautiful old building, which is a fine example of the best colonial architecture, held the first Supreme court of the United States.

WHAT AMERICA HAS DONE FOR EUROPE'S STARVING MILLIONS

In Eight Years Between Four and Five Billion in Foodstuffs Have Been Sent Into Famine-Stricken and War-Barren Countries—Charity Extends Across Europe Into Russia.

Thomas H. Dickinson, historian of the Hoover relief committee, has written for the New York Herald the first complete statement of America's contribution to the food relief of Europe that has ever been made. He says in part:

With the entrance of American food into Russia in the fall of 1921 American relief operations have traversed the continent of Europe. The span of these operations now covers eight years. It is not yet possible to give final figures on the mass of American food supplies delivered to Europe. The work done has, however, been of such a nature as to permit a summary of operations and a general suggestion of the main expenditures.

American food relief operations began in Belgium immediately after the outbreak of the war. Inaugurated as a charitable and administrative undertaking while America was neutral, American participation broadened after our entrance into the war, and took upon itself an official character. Thereafter and until the signing of the peace, food relief for the allies in Europe provided one of the main avenues of American helpfulness in the war. After the war ended American relief again became a private undertaking and has been so supported by individual charity, supplemented by certain governmental grants, to this day. American food relief in Europe thus falls into three periods.

First—The period of our neutrality from August, 1914, to April, 1917. During this period the commission for relief in Belgium was the instrumentality of relief.

Second—The period of American participation from April, 1917, to July, 1919. During this period the United States food administration was the official agency of relief.

Third—The period after the signing of the peace, during which the American relief administration has functioned as the agency of relief, with particular reference to the feeding of undernourished children.

Covers Nearly All Countries. During the eight years in which American agencies have been concerned in the feeding of Europe relief operations have extended into all countries, with the exception of Norway and Sweden on the north, Spain and Portugal on the south, Switzerland and Greece. American relief has been extended to Belgium as an innocent victim of the war, to the allies as colleagues in the war and to friend and foe alike, as well as to the new states of Europe after the close of hostilities.

While this work has been carried on under organizations with different names, all of them have had a continuing identity in that they have been under the direction of one man—Herbert Hoover—who first invented international food relief on modern lines.

For purposes of the digest it may be useful to distinguish between charitable contributions made by America to the feeding of Belgium throughout the period of our interest and those government grants from which came the mass of the support.

America's charitable contributions began in 1914 and continued to 1920. These were both in cash and in kind, and were collected both by organizations affiliated with the commission in the United States and by charitable individuals, foundations and national periodicals. From various charitable

Gastronomic Affinities.

The reason for ham and eggs, frankfurters and kraut, corned beef and cabbage and other kitchen staples is directly traceable to Yuan Mei, ancient Chinese philosopher, who wrote, centuries ago: "Cookery is like matrimony—two things served together should match."

For Bucket-Shop Victims.

Sign in Store Window—"Fleeced Men's Underwear, Greatly Reduced." Very properly, too. After being fleeced the poor fellows can't pay much.—Boston Transcript.

THIS IS HARD NAME TO YODEL

Paging Los Angeles Arson Suspect Wears Down Attaches of Superior Court.

Los Angeles, Cal.—Attaches of the Superior court here are hoping for a decision soon in the appeal of the man they call "Mr. Soda Fountain," who was convicted of arson. They are hoping principally that they will not have to write his name in the court records much longer. This is his name: Lieutlessusszszszszs Hurruzziszstszszl.

Colloquially, however, he is known as Leo Hirst.

Saw Squirrel Army.

Bellefonte, Pa.—Passengers on the Tyrone and Clearfield branch of the Pennsylvania, while traveling in the vicinity of the big fill one day recently, were interested in watching a small army of about 200 squirrels making its way down the hillside toward the valley. Hunters who have spent some time in the vicinity of the fill say that during the past two hunting seasons few squirrels have been killed in that section.

Gasoline is produced by "cracking" heavier oils. The Burton process for this production yielded in 1921 a daily average of some two million gallons.

Coy Watson and His Dogmobile

Coy Watson, Jr., a boy actor, is the proud possessor of this unique machine. It is known as the model 1922 Dogmobile and is one bow-wow power.

Saw Squirrel Army.

Bellefonte, Pa.—Passengers on the Tyrone and Clearfield branch of the Pennsylvania, while traveling in the vicinity of the big fill one day recently, were interested in watching a small army of about 200 squirrels making its way down the hillside toward the valley. Hunters who have spent some time in the vicinity of the fill say that during the past two hunting seasons few squirrels have been killed in that section.

Gasoline is produced by "cracking" heavier oils. The Burton process for this production yielded in 1921 a daily average of some two million gallons.

World's Climate Changeless.

The first striking fact in the geological history of climate is that the present climate of the world has been maintained since the date of the earliest, unaltered sedimentary deposits. The oldest sandstones of the Scotch highlands and the English longmyndes show that in pre-Cambrian times the winds had the same strength, the rain-drops were of the same size, and they fell with the same force as at the present day. The mean climate of the world has been fairly constant, though there have been local variations which have led to the development of glaciers in regions now ice free, at various points in the geological scale. That there has been no progressive chilling of the earth since the date of the oldest known sedimentary rocks is shown by their lithological characters, and by the recurrence of glacial deposits, some of which were laid down at low levels at intervals throughout geological time, according to the United States geological survey.

The Diving Bell.

The diving bell was not mentioned before the sixteenth century. Two Greeks, in 1538, gave an exhibition before Charles V, descending into water of considerable depth in an inverted kettle.

Was Famed as Great American

John Winthrop figures in history as the "Father of Massachusetts"—Leader in All Things.

John Winthrop, rightly called the Father of Massachusetts, for 19 years the guiding spirit of the colony, and for 12 of those 19 years its governor, died at his home in Boston, March 23, 1649.

Gastronomic Affinities.

The reason for ham and eggs, frankfurters and kraut, corned beef and cabbage and other kitchen staples is directly traceable to Yuan Mei, ancient Chinese philosopher, who wrote, centuries ago: "Cookery is like matrimony—two things served together should match."

Philly's First City Hall Restored

Philadelphia's first city hall, at Fifth and Chestnut streets, has been carefully restored and was dedicated with impressive ceremonies on May 2. The beautiful old building, which is a fine example of the best colonial architecture, held the first Supreme court of the United States.

WHAT AMERICA HAS DONE FOR EUROPE'S STARVING MILLIONS

In Eight Years Between Four and Five Billion in Foodstuffs Have Been Sent Into Famine-Stricken and War-Barren Countries—Charity Extends Across Europe Into Russia.

Thomas H. Dickinson, historian of the Hoover relief committee, has written for the New York Herald the first complete statement of America's contribution to the food relief of Europe that has ever been made. He says in part:

With the entrance of American food into Russia in the fall of 1921 American relief operations have traversed the continent of Europe. The span of these operations now covers eight years. It is not yet possible to give final figures on the mass of American food supplies delivered to Europe. The work done has, however, been of such a nature as to permit a summary of operations and a general suggestion of the main expenditures.

American food relief operations began in Belgium immediately after the outbreak of the war. Inaugurated as a charitable and administrative undertaking while America was neutral, American participation broadened after our entrance into the war, and took upon itself an official character. Thereafter and until the signing of the peace, food relief for the allies in Europe provided one of the main avenues of American helpfulness in the war. After the war ended American relief again became a private undertaking and has been so supported by individual charity, supplemented by certain governmental grants, to this day. American food relief in Europe thus falls into three periods.

First—The period of our neutrality from August, 1914, to April, 1917. During this period the commission for relief in Belgium was the instrumentality of relief.

Second—The period of American participation from April, 1917, to July, 1919. During this period the United States food administration was the official agency of relief.

Third—The period after the signing of the peace, during which the American relief administration has functioned as the agency of relief, with particular reference to the feeding of undernourished children.

Covers Nearly All Countries. During the eight years in which American agencies have been concerned in the feeding of Europe relief operations have extended into all countries, with the exception of Norway and Sweden on the north, Spain and Portugal on the south, Switzerland and Greece. American relief has been extended to Belgium as an innocent victim of the war, to the allies as colleagues in the war and to friend and foe alike, as well as to the new states of Europe after the close of hostilities.

While this work has been carried on under organizations with different names, all of them have had a continuing identity in that they have been under the direction of one man—Herbert Hoover—who first invented international food relief on modern lines.

For purposes of the digest it may be useful to distinguish between charitable contributions made by America to the feeding of Belgium throughout the period of our interest and those government grants from which came the mass of the support.

America's charitable contributions began in 1914 and continued to 1920. These were both in cash and in kind, and were collected both by organizations affiliated with the commission in the United States and by charitable individuals, foundations and national periodicals. From various charitable

Advertisement for Bayer Aspirin, featuring the Bayer logo and text: "Genuine Bayer Aspirin. WARNING! Say 'Bayer' when you buy Aspirin. Unless you see the name 'Bayer' on tablets, you are not getting genuine Aspirin prescribed by physicians over 22 years and proved safe by millions for Headache, Toothache, Earache, Colds, Neuralgia, Lumbago, Rheumatism, Neuritis, Pain, Pain. Accept only 'Bayer' package which contains proper directions. Handy 'Bayer' boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark of Bayer Manufacture of Monoclonal Doctor of Salicylic Acid."

Advertisement for Colac Internal Remedy: "CAUSE OF PILES INTERNAL TREAT THEM INTERNALLY. Trying to permanently relieve piles through operations is as silly as it would be to relieve toothache by cutting off an arm. To relieve any physical disorder the cause must be removed before relief can be expected. Salves, ointments and suppositories are not only messy and inconvenient, but are external treatments and so can supply only temporary relief. COLAC PILE PILLS are as easy to take as any pill. They tone up the circulation in the lower bowels, aid the organs to function normally and help to remove the enlarged veins that cause piles. Only 60c at drug stores or 65c in plain wrapper postpaid from Colac Chemical Co., Inc., Glens Falls, N. Y."

Advertisement for Lloyd Loom Products: "MADE FOR EMPEROR'S TABLE. Massive Silver Set Ordered by Napoleon I Put on Exhibition at New York. The massive silver set of 919 pieces ordered by Napoleon I, during the hundred days, delivered after his abdication to Louis XVIII, and used by the French royal family at Tuilleries palace from 1815 to 1830, has been placed on exhibition in New York. Two bullet holes in the soup tureen bear evidence of the revolutions it has passed through. Each article bears the Bourbon coat of arms, the fleur de lis surmounted with the crown and is stamped with the official government mark, the mark of the chief craftsman and of the guild. Napoleon I ordered this set of silver from Biennals on his return to France from his first exile on the island of Elba. It was made during the hundred days of Napoleon's second reign, but before it could be delivered Napoleon was forced to abdicate and was again exiled this time to end his days on St. Helena. Louis XVIII, his successor, paid Biennals for the silver and had the Bourbon coat of arms placed on it. The set of silver passed finally to the heirs of the duc de Chambord and through them has come to North America. A Second Chance. 'Do I understand you to say that you will sell this \$70 dining-room set on the installment plan for only \$500 down and \$3 a week?' 'That's the offer.' 'Why, man, by the time it was paid for it would be old and worn out.' 'Yes, I know. But then you could sell it for a genuine antique!'—Judge. Use This Coupon. The Lloyd Mfg. Co., 150 Broadway, New York, N.Y. Please send me your booklet, 'Mothers of the World.' Name: _____ Street: _____ City: _____ State: _____"

TANLAC KEEPS HIM FIT, SAYS McGRAW

Has Used It for Years With Splendid Results—Fine for Run Down Condition.

"For four years Tanlac has kept me in the pink of condition as I take a few doses of it every time I feel a little run down and it always builds me up again," said Wm. A. McGraw, 207 Beach Place, Tampa, Fla.

"I began taking Tanlac first about four years ago when I was in a very bad state of health and had been run down for several years. I was always taking laxatives, too, but I believe they did me more harm than good.

"Tanalac made me feel like a brand new man in a very short time and I have never had a return of any of my old troubles. The reason of this I am firmly convinced is that I always have Tanlac handy and take a few doses every time I feel a bit under the weather."

Tanalac is sold by all good druggists.

Planet Without Oxygen.
According to the spectroscopic studies made at the Mount Wilson observatory of the light received from Venus, no oxygen-absorption lines are found. This indicates that there is no oxygen or water vapor in the outer atmosphere of Venus, and furthermore that the reflected light of the sun must have penetrated to a considerable depth.

It therefore appears necessary to attribute the great brightness of Venus to some other cause than that of high reflective power of water-vapor clouds, and this apparent absence of oxygen must be considered in connection with speculations as to the conditions of the planet.—Popular Mechanics Magazine.

A Dove of a Girl.
"Has your typewriter a billing attachment?" "No; but she has a cooling attachment."

One must not only speak charitably, but must also feel charitably.

CHANGE OF LIFE WOMAN'S TRIAL

Proof That Lydia E. Pinkham's Vegetable Compound is of Great Help at This Period

Metropolis, Illinois.—"I have taken Lydia E. Pinkham's Vegetable Compound and it is all it claims to be and has benefited me wonderfully. I had been sick for eight months with a trouble which confined me to my bed and was only able to be up part of the time when I was advised by a friend, Mrs. Smith, to try Lydia E. Pinkham's Vegetable Compound and Liver Pills. I was so much benefited by the use of these medicines that I was able to be up and about in two weeks. I was at the Change of Life when I began taking the medicines and I passed over that time without any trouble. Now I am hale and hearty, do all my housework, washing, ironing, scrubbing, and cooking, all there is to do about a house, and can walk two or three miles without getting too tired. I know of several of my neighbors who have been helped by your medicines."—Mrs. EMMA CULVER, 705 E. 7th St., Metropolis, Illinois.

Depend upon Lydia E. Pinkham's Vegetable Compound. Nervousness, irritability, heat, flashes, headache, a dizzy, scrubbing, and cooking, all there is to do about a house, and can walk two or three miles without getting too tired. I know of several of my neighbors who have been helped by your medicines."—Mrs. EMMA CULVER, 705 E. 7th St., Metropolis, Illinois.

LONG SANDMAN STORY

THE WRENS WERE LATE

MR. AND MRS. ROBIN had arrived from the South and so had some of the other travelers, but Mr. and Mrs. Wren were nowhere to be seen. "They passed us on the way," said Mrs. Robin. "I thought they would be here ahead of us this year."

"Don't you know, my dear, why the Wrens are always late?" asked Mr. Robin. "If you had used your ears as well as your eyes you would be certain to know. I think it is the fault of Mrs. Wren. Now, when they arrive you listen and I feel sure you will find out why they are late in getting North. Of course, it may be that Mr. Wren is at fault a little, but I think it is his wife that is really the cause."

It was nice spring weather when one morning the Wrens arrived and Mrs. Robin was just getting ready to

you," said Mr. Wren, who managed to get a word in at last. "I would be looking now for a place to 've if you had not stopped me to scold me—"

"Scold!" screamed his wife. "Why, how can you say such a thing? I never scold, Mr. Wren, unless you call standing up for my rights scolding. Now, tell me why we can't go back to our old home."

"I was trying to tell you," said her husband, "but you talked so fast I did not get a chance. There is some one in our old home. I told you we should be very late, stopping so often, but you would have your own way, and now you see what you get."

Mrs. Wren was hopping and flitting her tail, trying to stop her husband's chatter, but he had the chance to talk and he meant to keep it. "You found so much fault and stopped to scold me so often all the way up that we will have to hunt for a new home."

Mr. Wren stopped to get his breath and Mrs. Wren began at once. "Who has our home? We will go right over and order them out. I guess if you can't stand up and fight for our rights, Mr. Wren, I can; and lucky for you that you have me around."

"Come back!" called Mr. Wren. "I have found a better home—a hole in a tree where no one else has a home, and nearby are plenty of nice little sticks and some straw, too."

Mrs. Wren forgot about the old home. "Come," she said to her husband, and as they flew away Mrs. Robin heard her say, "I expect I shall have to throw out half of them; you always get the wrong sort when we build."

When Mr. Robin came home his wife said, "I have found out why the Wrens are so late in getting North. They arrived today and they sat for a while on a limb of this tree."

"It is because Mrs. Wren stops so often to scold, and I must say that he

Corinne Griffith

One of the greatest American critics recently proclaimed Corinne Griffith as "one of the three most beautiful women on the 'movie' screen." At the age of eighteen she was crowned queen of the "Mardi Gras" at New Orleans. Miss Griffith's dress creations have set the vogue for millions of her admirers. She has come to be known as the best gowned woman appearing in motion pictures. She is a Texan by birth. This is one of Miss Griffith's latest pictures.

is not far behind her in scolding when he gets a chance."

"Yes, when he gets a chance," chirped Mr. Robin. "But that is not often, for Jennie Wren is a regular little chatterbox."

"Of course, you would take his part; all husbands stand up for each other," chirped Mrs. Robin, and she flew to her nest.

The Right Thing at the Right Time By MARY MARSHALL DUFFEE

WHEN THEY ARE TARDY

IT IS a perfectly natural thing to feel that when a person whom you employ to work for you for stated hours is tardy, you are being deprived of what is rightfully yours. That is, of course, if you propose to and do pay for full-time work. However, it is not the easiest thing in the world to correct a person for tardiness or to correct the tardy habit without giving offense.

It may be that the woman who washes for you is due to come at eight and does not appear until half-past nine. What are you going to do about it? Or it may be that the woman who sews by the day is a little late every day she comes, thus in the course of a season really depriving you of many hours of service for which you have actually paid. It may be, too, that the typist or telephone operator in your

"What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel

MAY

THE youthful name of May is peculiarly difficult to discuss. There are two explanations of its existence. Some etymologists claim that it is the final contraction and endearment of Margaret and translate it to mean "a pearl."

But though May is undoubtedly one of the innumerable forms of Margaret, coming through the Scotch by stages of evolution from Maisie and Maudie, it is so much simpler and more logical to believe that May is really one of the calendar names bestowed in honor of the fifth month of the year. It is the name of springtime and blossoms and nesting birds and as such has a place of distinction all its own. It has no antecedents, under this theory, and cannot be contracted more than it already is.

A helpful Remedy for Constipation and Diarrhoea, and Feverishness and LOSS OF SLEEP resulting therefrom in Infancy.

Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your ailing child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

His Answer. Crossing the street the Woman dodged the motorcars, taxis and wagons. She was almost safely on the other side when a very young boy on a bicycle almost steered into her.

The Woman turned around. "Why don't you blow your horn instead of almost knocking a lady down?" she called out crossly.

The boy grinned. "Lady," he yelled, "you can't blow what you ain't got!"—Chicago Journal.

Definitions. Merit—The thing that gets you everything desirable you have. Pull—That which obtains for your neighbor everything worth while that comes his way.

No woman can hide all her Imperfections from her dressmaker.

Some people will believe anything you tell them, if it's bad enough.

Down Went the Mercury. Sitting alone at one of the big concerts last winter, I chanced some casual remarks to a man on my left.

After some pleasant conversation I noticed a celebrity in the front row, and, pointing him out to my companion, remarked: "That old fellow used to have a wonderful tenor voice; it's rather painful to listen to. The old man doesn't seem to realize it, though. Don't know him, do you?"

"Yes," replied my companion. "He is my father."

At the first interval I found myself another seat.—Exchange.

They Can't Help It. Reggie—"Every stage has wings, has it not?" Archie—"Yes; that's what make the chorus girls fly!"

Impossible. "What happens when an irresistible woman meets an immovable man?" "She never does."—Life.

Some men's wishbone is where their backbone ought to be.

When Hungry Little Muscles Say, "Please Help Me"

DID you ever stop to think who it really is that's talking, when childish voices raise a clamor, "Mother, I'm hungry?"

It's really muscles and bones and nerves and cells worn in the stress and strain of play—that are calling for rebuilding material.

What kind of an answer? The right thing, or just anything? It makes a big difference.

Grape-Nuts, so deliciously crisp and appetizing to taste, and so quick and convenient to serve, is a splendid food for rebuilding young bodies. All the wonderful nutriment put in wheat and barley by Nature, including the vital mineral elements, is there—and Grape-Nuts digests easily, quickly and completely. Served with cream or milk, Grape-Nuts is exceptionally nourishing.

"That's splendid!" says appetite. "That's just the need!" say the hungry muscles, nerves and bones.

Ready to serve right from the package—always crisp and fresh. A favorite dish with all the family. Sold by grocers.

LOCAL NEWS
(Continued from page three)

Many familiar faces from out of town were seen in Tuckerton on Tuesday. Some attended the ball game, some took dinner or supper at the Town Hall and many attended the Movies. In fact it was thought that there were many more out of town folks here than ever in the history of the town.

Carol Stratton and wife of Beach Haven, spent Memorial day in Tuckerton and New Gretna.

Miss Edna Ireland of Philadelphia, visited her mother, Mrs. Rose Rider, the past week.

George I. Hopper of Barnegat, spent Memorial Day with his mother, Mrs. J. Hopper.

Mr. and Mrs. Barton P. Seaman and daughters, Eleanor and Gladys of Philadelphia, were among our holiday visitors.

Mr. and Mrs. Frank Taylor of Philadelphia were recent visitors with the latter's sisters, Mrs. Florie Stiles and Miss Ida Rider.

Miss Grace Sopher of Barnegat spent the week end with Miss Jennie Seaman.

Edward Cortez of Rocky Point, visited friends here over the week end.

Charles Hill of Atlantic City, visited Mr. and Mrs. Samuel Horner the past week.

Samuel Cranmer of Little Beach C. G. S., was home with his family this week.

Sylvester Mathis of Atlantic City, visited his parents, Mr. and Mrs. Orlanda Mathis.

Samuel Andrews of Atlantic City, is visiting friends in Tuckerton.

Miss Elizabeth Parker, of Philadelphia, was a visitor with her parents, Mr. and Mrs. S. Barton Parker over the week end and holiday.

Mr. and Mrs. John Stevens and daughter, Mrs. Anna Sanger of Millville, spent Tuesday with Mr. and Mrs. Wm. H. Gale, Sr.

Mrs. S. S. Alexander, daughters, Alma and Bessie, Mrs. Ida Hewitt, Harold Falkenburg, Mr. and Mrs. Washington Averdick, were recent visitors with Mr. and Mrs. Frank Swain.

George Morey and son Lloyd Morey and family of Atlantic City, were Tuesday visitors in the home town.

Mr. and Mrs. Herbert Andrews, Mr. and Mrs. Charles Falkenburg, daughter, Helen, Mr. and Mrs. Harry Falkenburg, sons Harry and Francis, Joseph Dempsey and Miss Gerner were Memorial Day visitors with Mr. and Mrs. Ralph Falkenburg.

Mr. and Mrs. Philip Blackman and son, Lester, were Memorial Day visitors with Mr. and Mrs. Wilbur Jones.

Mrs. Elizabeth Jones and Mrs. Harvey Mathis spent Monday in Atlantic City.

Mr. and Mrs. Lawrence Fasano have returned home after spending several months in Panama.

Mrs. S. P. Bartlett is spending some time in Burlington.

Lester McConomy of Philadelphia was among our holiday visitors.

Mrs. Anson Rider has been visiting relatives in Atlantic City.

Mrs. Susie Riley of Atlantic City, spent Memorial Day with friends in town.

Floyd Gaskill, daughter Elizabeth and Misses Rebecca Rebecca Rider and Estella Gaskill spent Saturday in Atlantic City.

Mr. and Mrs. John R. Smythe and son James, are at their summer residence here.

Frank Morey of Atlantic City, was home with his parents, Mr. and Mrs. Charles Morey the past week.

Miss Gertrude Brown of Trenton spent the week end with her parents Mr. and Mrs. Joseph Brown.

Mr. and Mrs. William Jackson of Perth Amboy, were holiday visitors with the latter's parents, Mr. and Mrs. Henry Truex.

Frank Jones is spending some time in Philadelphia.

Thomas Driscoll of Chestnut Neck has been visiting his son, Benjamin Driscoll.

Mr. and Mrs. Rodney Morrison, son William and daughter Anna, of Camden, spent the holidays with Mr. and Mrs. Harvey Mathis.

Mr. and Mrs. George Quinn, Jr., and daughter, Wilmina, have moved to Atlantic City, where they will spend the summer.

We regret to learn of the serious illness of Mrs. Sadie Heysinger at her home in Philadelphia. Mrs. Heysinger was formerly Miss Sadie Spencer of Tuckerton.

Mr. and Mrs. Ross and neice Anna,

Will Last a Generation

Here are real "old-fashioned-quality" shingles that answer the question "With what shall I protect the roof and side walls of my home to have assurance of an artistic exterior and insurance against the everlasting repair and repainting bills?"

"CREO-DIPT" STAINED SHINGLES

assure enduring artistic beauty; they are proof against decay, worms and weather. Every shingle is perfect—no wedge shapes, no waste. Cost less than staining on the job and will last a generation.

See Samples of Colors on Wood, and get our Prices.

Standard Colors in Stock. Special Orders Promptly Filled.
